TRUSTEES' REPORT.

To His Excellency, Governor O. P. Morton:

The Trustees of the Institution for the Education of the Deaf and Dumb, in compliance with the law, respectfully present to you this, their eighteenth annual report.

The history of the Institution for the past year, both in relation to its educational and industrial interests, and the management of its pecuniary and domestic affairs, gives abundant evidence of its increasing value and usefulness. It is a matter of regret, however, that there has been so large a diminution of the number of pupils. The number in attendance the present term, is one hundred and forty-two, while the last term it was one hundred and seventy-one. This loss of numbers is doubtless due to the derangement of the public interests of the country, growing out of our national difficulties. It is to be hoped that the parents and guardians of these pupils will soon make such arrangements as will enable them to return them again to the Institution.

We have witnessed, with increased interest, the wonderful effects of the system of education pursued in the Institution, in arousing and calling into activity the dormant intellects of the pupils. The condition of the uneducated mute is one of extreme ignorance and degradation. In former times he was considered as a burden to

society, and a companion only for the idiot and the insane. But the system adopted in our own and in similar American Institutions, founded upon the great principle that there is no more natural and necessary connection between abstract ideas and *words*, than there is between the same ideas and *visible signs*, unlocks to his mind the whole storehouse of knowledge, and, in point of intellectual and moral culture, elevates him to a level with the more fortunate of his race.

Notwithstanding the general depression of all kinds of business, we are happy to state that the work-shops belonging to the Institution were never in a more satisfactory condition. Under the faithful supervision of experienced foremen, the pupils become thorough masters of their respective trades, and the receipts for articles manufactured are more than sufficient to pay all expenses.

The Trustees, in accordance with the law, are required to make a monthly examination of the accounts of the Institution for the current expenses. We have faithfully attended to this duty. All the bills of purchases made have passed under our immediate inspection; and we can say with confidence, that the funds have been judiciously and economically managed.

At the last regular session of the Legislature, the sum of fifteen thousand dollars was appropriated to furnish the Institution with a steam-heating apparatus. Measures were accordingly taken to secure the construction of this important work. It is now finished in all its essential parts. It has been constructed on the most approved plan, and of the best materials; and it has all been done within the limit, and according to the terms of the appropriation. In the language of the Superintendent's Report, "we doubt whether there ever has been a steam-heating apparatus of the same extent and kind made in this country, more perfect or at less cost." By the introduction of steam-conducting pipes into an apartment in the basement of the building, facilities are secured for washing and drying the clothing of the pupils. This will remove the necessity for the erection of an additional building for this especial object. The engine and boiler house is fire-proof, and is unconnected with the main building, thus rendering the destruction of the building by accidental fires, next to impossible. This will secure to the Institution an annual saving of insurance to the amount of at least five hundred dollars.

To our worthy Superintendent we would express our acknowledgement for his persevering and efficient services rendered throughout the prosecution of this work; and, for the particulars of the several contracts entered into, as well as for the detailed statements of the financial affairs of the Institution, you are respectfully referred to his extended and able Report.

ANDREW WALLACE, *Pres't.*,
JOHN M. KITCHEN, } *Trustees.*
JAMES C. BURT, }

SUPERINTENDENT'S REPORT.

To the Board of Trustees:

GENTLEMEN:—Recognizing the high responsibility of the charge entrusted by you to me as the chief executive officer of the Institution, and, acknowledging my accountability to you for its faithful management, it is with much satisfaction that I am permitted to report its continued prosperity and usefulness.

The changes which have been made in the affairs of the Institution during the year, have been so slight, and the transactions which have taken place have been so few, beyond the ordinary business of former years, that a very brief report will suffice on the present occasion.

The course of study and general system of management have been so often described in previous reports, that it is not necessary at this time again to advert to them further than to say, that they continue essentially the same as in former years.

The number of pupils in attendance last session was one hundred and seventy-one. Thirty of these were dismissed at the close of the term; sixteen of whom, having successfully completed the prescribed course of study, were granted honorary certificates of character and scholarship; and the others, though they had not finished the full course, were, for various reasons, withdrawn or discharged from the school. This unusually large number have left us, having, under the

instruction which we have been able to give, acquired such a degree of knowledge, and formed such principles of rectitude and habits of industry, as lead us to believe that they go forth into society with encouraging prospects of obtaining and adorning positions of respectability, comfort, and usefulness.

Sixteen new pupils only have entered this term; and fifteen of those belonging to the regular classes up to this time have failed to return. The large number discharged and the small number of new admissions, with the absentees, render the attendance this session considerably less than it was last. The actual attendance at this date is one hundred and forty-two.

The reason for so large a diminution of the number of our pupils is found in the excitement and derangement consequent upon the war. Many, in their enthusiasm, supposed that the Institution would be suspended until the government had conquered a peace. Others entered the army without making provision for sending their children to school. And though the deaf and dumb themselves are not allowed to enter the ranks as soldiers, yet a considerable number of our older boys have been kept at home to supply the places at work of brothers or fathers who have gone to fight for their country. And others, through fear of impending evil have been deterred from sending their unfortunate children from home.

Accompanying this report we give a catalogue of the names and residences of all the pupils who have been under instruction during the year just closed.

The assistant Teachers, employed during the year, have continued to render without interruption their zealous and efficient services to the entire satisfaction of the Superintendent, and in such a manner, it is believed, as will warrant your commendation, and the approbation of the community by whose liberality the Institution is sustained. With one exception they remain the same as those engaged last session. William M. Young, a graduate of the Institution, who was employed temporarily at a small compensation to instruct an irregular class, terminated his engagement and left us at the close of the term.

In the officers of the domestic department of the Institution two important changes have been made. Dr. Livingston Dunlap, for many years our physician, and Wm. R. Hogshire, for five years our Steward, have been superceded by the appointment of Dr. P. H. Jameson to the place of the former, and William R. Foster to that of the latter.

Of the persons superceded, I desire to express my high estimation of the services they have rendered, and my cordial approbation of the manner in which they have conducted themselves while in office under me.

Dr. Jameson and Mr. Foster entered upon the discharge of their duties the first of last month; and they have, and, I have no doubt, will continue to discharge them, with honor to themselves and profit to the Institution. Experience in the use of our peculiar method of communication, which they in time will gain, will render them fully equal to their predecessors in office. They have already given evidence in their new positions of an intelligence and zeal which gives promise of entire success.

The financial affairs of the Institution, I am happy to state, are in a favorable and satisfactory condition. Strict economy has been exercised in all the disbursements, and the funds placed at our disposal used to the best advantage. The appropriations made by the Legislature have been strictly applied according to the terms on which they were granted, and have proved sufficient to accomplish the purposes for which they were intended.

The following general statement will exhibit the exact condition of the funds at the present date according to the books of the Institution. There is, we are aware, as there always will be, an apparent, though not real, yet unavoidable discrepancy between our annual statement of account and that of the Auditor, resulting from our method of disbursement. We pay out no money; all accounts are settled by orders of the Board on the Treasury, and we credit ourselves with all orders issued. It is impossible for us to tell how many orders issued last year were unpaid at the end of the year, or how many issued the year before were paid last year. The Auditor's books, therefore, taking any single year, may show either a greater

or a less amount of payments than ours; greater, if orders issued the previous year were paid in the last, or less, if orders issued the last year are still unpaid at the close of the year. Our statement shows the amount of our means within the year from whatever source derived, and the amount of payments by orders or otherwise, whereas the Auditor's will show simply the appropriations to our credit and the amount of warrants issued on our orders which have been presented within the period named.

RECEIPTS:

From Nov. 1st, 1860, to Nov. 1st, 1861.

On account of Current Expenses.....	\$34,153 43
On account of Heating Apparatus.....	15,000 00
On account of Work Shops	3,614 06
On account of Pupils' Clothing.....	835 32
	<hr/>
Amounting to.....	<u>\$53,602 81</u>

DISBURSEMENTS:

From Nov. 1st, 1860, to Nov. 1st, 1861.

On account of Current Expenses.....	\$27,978 91
On account of Heating Apparatus.....	10,396 10
On account of Work Shops	3,474 72
On account of Pupils' Clothing	1,022 91
	<hr/>
Amounting to.....	\$42,872 64
Balance on hand	<u>\$10,730 17</u>

From the foregoing statement it will be perceived that the payments on account of current expenses for the year have slightly exceeded the appropriation for this purpose; but this excess will be more than made up by the amount that is due to this fund from counties for clothing advanced to indigent pupils. The amount on hand and available, therefore will be sufficient to defray all ordinary payments on this account up to the end of the first quarter of the present fiscal year, when the annual appropriation will be due at the Treasury.

The specific appropriation to supply the Institution with a steam heating apparatus has been applied in accordance with the terms of of the grant. Immediately after the adjournment of the Legislature, measures were taken to carry into effect this much needed improvement. Mr. F. Costigan was appointed Architect, and directed to prepare plans and specifications for the necessary buildings. Contracts were entered into with Miles Greenwood, of Cincinnati, for the piping, with Dumont & Sinker for the boilers and their attachments, and with Jacob Rubush and others for the erection of the boiler-house and smoke-stack, and the work was commenced as early in the season as was practicable. The unusually low price of material and labor, and a fair competition, enabled us to make contracts with responsible and skillful workmen at extremely low rates; and thus we have secured the construction of a more extensive and complete apparatus than we at first supposed possible with the means placed at our disposal. It embraces not only a thorough system of heating and ventilating the school-rooms and chapel, dining-rooms and study-rooms, halls and dormitories, public offices and parlors, and private rooms of officers, teachers and domestics, but also an abundant supply of hot and cold water for all needed purposes, and an arrangement with all the necessary conveniences for washing and drying the clothing of the pupils by steam. We are permitted, therefore, to congratulate ourselves not only upon the extremely favorable terms upon which the work has been done, but also upon the amount and completeness of the apparatus constructed. We doubt if there ever has been a steam-heating apparatus of the same kind and extent, made in this country more perfect or at a less cost.

Our design in the outset was to have the whole completed by the time the cold weather should make a fire necessary in the fall; and the contracts were made binding upon the workmen to have it done in time. But the removal of the old furnaces, and the alterations required in the flues and other parts of the buildings, together with some unavoidable delays in getting material, and the necessary waiting of some parts of the work for others, caused a protraction of the job later in the season than was agreed upon, or than was pleasant. However, favored with warm weather beyond what is usual, we succeeded in getting the apparatus so far in operation as to avoid any except a slight inconvenience from cold to the inmates for a few days only. Early in October it was brought into use throughout the chief

parts of the establishment. Since then the workmen have been engaged until recently in adjusting and perfecting the machinery. It is now finished, and seems to be admirably adapted to the purpose for which it was designed. And although there has not been sufficient time to test it fully, and consequently we are not prepared to pass a final judgment upon it, yet we are persuaded that it will, on trial, fulfill our highest anticipations of it.

Our agreements with the contractors were made conditional upon the retention by the Board of twenty per cent. of the price of the work as a guarantee for the faithful completion and satisfactory operation of the parts of the job severally contracted to be done by them. All have finished their contracts, and the work of some of them has been approved and accepted, and they have been paid in full. From others the twenty per cent. has been withheld until we have had a fair opportunity of proving their work.

There have been paid out of the appropriation, on account of this improvement, \$10,396 10, and there remain on hand at this date, \$4,603 90 unexpended. Notwithstanding a final settlement with some of the contractors has not yet been consummated, nevertheless the business of closing the accounts is in such a state of forwardness as will justify us in assuring the Board that the above balance will be amply sufficient to discharge every just claim against the Institution for this improvement.

The manual labor department of the Institution, though incidental, yet a very important feature of the system of training in use for our pupils, has received its due proportion of solicitude and attention. Our labors in this field the last year have been but a repetition of their successful prosecution in former years.

The farm and garden belonging to the Institution have been as well managed and as productive as ever before.

The work-shops have been usefully and profitably conducted. The receipts from the sale of articles manufactured in them have more than paid all expenses of their management, including instruction, stock and tools. The boys engaged in learning trades have cheerfully and diligently devoted the time allotted to these pursuits.

Generally they have shown a proper appreciation of the advantages afforded them; and have made improvement, it is believed, equal to that of any other apprentices under similar circumstances. The foremen in each of the shops are skillful workmen, and faithfully and assiduously devote their time and energies to the promotion of the best interests of their respective charges.

The female pupils, under the judicious management of the Matron and Assistant Matron, have given a portion of time each day to sewing, knitting, and such other domestic duties as will best fit them for filling their places in society with advantage.

As the new Treasury law which went into effect about the middle of last session prohibited the Treasurer from paying out any money for any purpose, except by virtue of an appropriation by the Legislature, and as the last Legislature omitted to appropriate the funds realized from the business of the shops, to the Institution for their support, the Board were compelled, in order to sustain this important part of their charge, to retain this money within their own control, and to use it for this purpose as occasion required. Previously to this enactment, all the cash received from the shops was paid over to the Treasurer, and was placed to our credit, and was drawn out on the order of the Board as it was needed to defray the expenses of this department. Since the new law has been put in force this money has been paid over, from time to time as it has been realized, to the Superintendent, and held by him, under bonds, subject to the order of the Board; and except on their order none of it is allowed to be used for any object whatever. All the expenses of the shops are charged to this fund, and the bills, the same as other accounts, are audited by the Trustees, and when allowed are paid from this source. Therefore our statement of this account this year will differ from that of the Treasurer, as ours embraces the receipts and disbursements of the whole year, while his will include only the transactions of this kind up to March last. The above statement will, it is believed, be a satisfactory explanation of the difference.

It will appear in the statement of account for pupils' clothing that the payments have exceeded the receipts from counties, \$187 59. The explanation of this is, that the payments embrace those for the whole year; whereas the receipts only include those up to the first of

2—D. & D.

last April, when a settlement was made with the Treasurer. The clothing purchased since then for indigent pupils, to the credit of which the Institution by law is entitled, whenever the bills shall be rendered, will more than balance this account. By a reference to the law on this subject it will be seen that the superintendent is required to supply those of the pupils whose parents or guardians are not able, or who neglect to furnish them, with comfortable clothing; and to charge the same to the counties from which such pupils are sent. The payments for these clothes are advanced out of the current expense fund, and the bills are presented to the State Treasurer, who is required to charge them to the respective counties, and to place the amount to the credit of the current expense fund of the Institution.

The usual number of newspapers and periodicals have been contributed to the Institution the last year, a list of which, with the names of the editors and proprietors, will be found in the appendix. In behalf of the pupils we assure the donors that their gifts are thankfully received, and highly prized, and respectfully ask a continuation of the favor.

With these statements of the condition of the Institution, I most cordially and earnestly commend it to the fostering care of the Board, to the continued favor and patronage of the community, and to the generous support of the friends of humanity throughout the State.

All of which is respectfully submitted,

THOMAS MAC INTIRE,

Superintendent.

INSTITUTION FOR THE DEAF AND DUMB, }

SIDNEY J. VAIL,
Librarian.

STEWARD'S REPORT.

To the Superintendent:

SIR:—I respectfully submit a report of the products of the farm and garden owned by the Institution, for the last year. As I have just entered upon the discharge of my duties as Steward, it will not be supposed that I could have a very accurate personal knowledge of this department; and hence I am compelled to make up the following statement from memoranda kept principally by the gardener. Without vouching for the exact accuracy of all the items, I may say that it is as true an estimate of the products of the farm and garden for the past year, as I am able to make:

PRODUCTS.

5 tuns of hay.....	at \$9 00	\$45 00
600 bushels corn.....	at 20	120 00
800 bushels Irish potatoes.....	at 30	240 00
200 bushels early potatoes.....	at 60	120 00
200 bushels sweet potatoes.....	at 70	140 00
15 bushels parsneps.....	at 75	11 25
10 bushels turnips.....	at 50	5 00
50 bushels green peas.....	at 50	25 00
30 bushels green beans.....	at 50	15 00
30 bushels beets.....	at 50	15 00
3,600 drumhead cabbage.....	at 2	72 00
600 early York cabbage.....	at 2	12 00
100 red cabbage.....	at 2	2 00
500 bunches cellery.....	at 3	15 00

80 bushels tomatoes.....	at	50	40 00
200 bunches cauliflower.....	at	5	10 00
600 bunches asparagus.....	at	5	30 00
550 bunches pie plant.....	at	5	27 50
1,500 bunches lettuce.....	at	2	30 50
650 bunches raddishes.....	at	5	15 00
2,920 gallons milk.....	at	20	584 00

Amounting to..... \$1,604 25

All of which is respectfully submitted,

WM. R. FOSTER, *Steward.*

DEAF AND DUMB ASYLUM, Indianapolis, Nov. 1, 1861.

RULES AND REGULATIONS

FOR THE

ADMISSION OF PUPILS.

I. The Institution is open to all the Deaf and Dumb of the State between the ages of ten and twenty-one years, for admission as pupils, *free of charge*, for boarding and tuition, upon compliance with the rules. Applicants from other States will be received as pupils on the payment, in advance, of one hundred dollars a year for boarding and tuition.

II. The Institution will provide for each State pupil regularly admitted, boarding, lodging, washing, superintendence of conduct, manners and morals, medical attendance, instruction, school books, slates, and all other incidental expenses of the school room, without charge; but will not pay the traveling expenses of pupils in coming to or returning from the Institution, nor supply them with clothing, except in extreme cases of destitution.

III. Those who are unable to pay for the necessary clothing, or whose parents neglect to supply them, it is made the duty of the Superintendent to furnish, in accordance with the following Legislative enactment:

“That when the pupils of the Institution for the Deaf and Dumb are not otherwise supplied with clothing, they shall be furnished by the Superintendent, who shall make out an account therefor, in each case, against the respective counties from which said pupils were sent, in an amount not exceeding twenty dollars per annum for every such pupil, which account will be signed by the Superintendent, and attested by the seal of the Institution for the Deaf and Dumb; and the Treasurer of State shall charge the

account thus certified to the county from which the pupil was sent, and credit the amount to the current expense fund of the Indiana Asylum for the Deaf and Dumb."

"SEC 3. When such account shall be received by the Treasurer of the proper county, to whom it shall be immediately sent upon its reception by the Treasurer of State from the Superintendent, such county Treasurer shall cause the same to be paid out of the county Treasury to the Treasurer of State. And such county Treasurer shall collect the amount of such account from the estate of such pupil, if he have any, by suit, if necessary, in the name of the county."

IV. Each applicant for admission should come well supplied with clothing; and on all articles on which it is possible to mark the name of the pupil, it should be written with indellible ink. In all cases, except those clothed by the county, besides the ordinary supply of clothing, the applicant should deposit with the Superintendent a sum of not less than \$3.00 to defray incidental expenses, repairs of shoes, &c., any part of which remaining unexpended at the close of the session will be returned. Each pupil should be supplied with a trunk.

V. Pupils will be admitted on the following conditions: 1st. The pupil, well provided with clothes, is to be brought to the Asylum punctually at the commencement of each session, unless detained at home by his or her sickness. 2d. The pupil is to remain in the school until the last Wednesday in June, of each year. 3d. No parent or guardian shall be allowed to take a pupil out of the school in session time, without the consent of the Board of Trustees.

VI. The annual sessions of the school commence on the 15th day of September, and close on the last Wednesday of June. *Every pupil is to come promptly on or before the first day of the session, and is to remain until the last day of the same. The only exception allowed are cases of sickness.*

VII. No pupil, unless under extraordinary circumstances, can be received at any other time than the commencement of the session.

VIII. The length of the course of instruction is five years; and, that the pupils may become more proficient in their studies they are allowed and advised to remain one year longer. At the end of six years, the Superintendent may select such pupils as he may consider would be particularly benefitted by continuing longer at school, and, if approved by the Board of Trustees, they shall be permitted to remain an additional year.

IX. It is the intention of the Trustees to render the pupils self-supporting, so far as practicable, and that every pupil, on leaving Institution, shall be so proficient in some useful occupation or trade as to be able to procure a livelihood without reliance on the charities of others. In accordance with this design, all the scholars will be required to labor a portion of each day, the girls in performing the lighter kinds of housework, and in various kinds of needle-work, as plain sewing, ornamental work, dress making and millinery, and the boys at various trades, the necessary work about the Asylum, and in the cultivation of the farm and garden.

X. All business letters, or letters of inquiry in regard to pupils in the Asylum, or those whom it may be designed to place there, should be addressed to THOMAS MAC INTIRE, *Superintendent, Institution for the Deaf and Dumb, Indianapolis.*

XI. Those persons bringing pupils to, or taking them away, can not be furnished with board, lodging or horse-keeping at the Asylum.

XII. Applicants for admission should be between ten and twenty-one. But a discretionary power of varying from the rule is lodged with the Board of Trustees. Twelve, in ordinary cases, is considered the best age for entering the Institution.

XIII. All applications should be accompanied with written answers to the following questions:

1. What is the name, in full, of the applicant?
2. What is the age of the applicant? If possible, give the day, month and year of birth.
3. What is the name of the father or nearest friend? his post office address, including county and town?
4. Can the applicant defray all his or her expenses at the Institution for clothing? or would he or she have to be clothed by the county?
5. Is the applicant in good health and of sound mind? What is the state of his or her general health?
6. Was the applicant born deaf? If not, at what age did he or she lose his or her hearing, and by what disease or accident?
7. Can the applicant speak at all? If so, has his or her speech failed or improved within the last year or two?

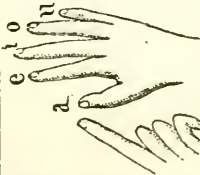

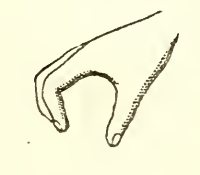

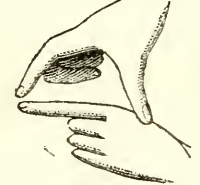

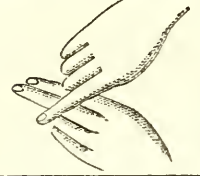

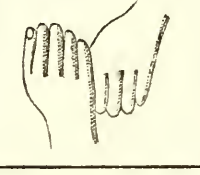

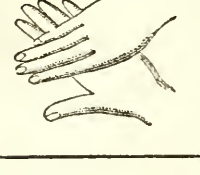

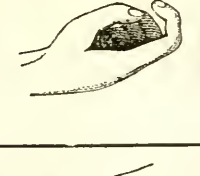

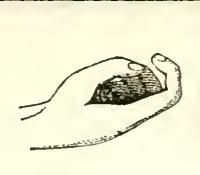

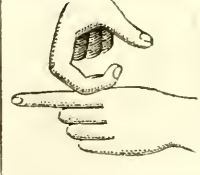

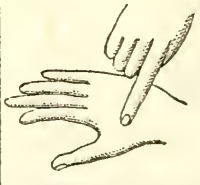

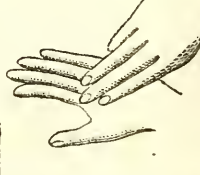

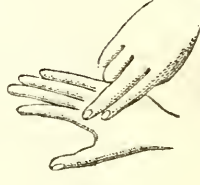

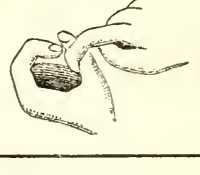

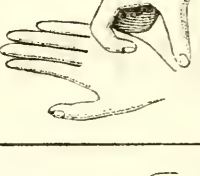

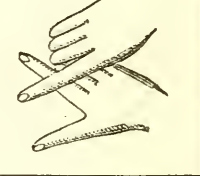

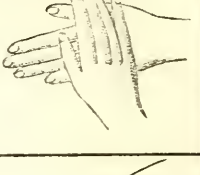

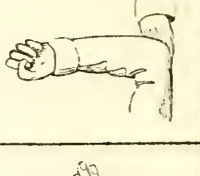

8. Whether the deafness is total or partial? If partial, what is the degree of hearing? Can he or she hear any articulate sounds? What noises can he or she hear?

9. It is expected that the applicant will spend the vacation at home.

ANNUAL REPORT

OF THE

COMMISSIONERS,

SUPERINTENDENT AND TREASURER

OF THE

Indiana Hospital for the Insane,

FOR THE

YEAR ENDING OCTOBER 31, 1861.

TO THE GOVERNOR.

INDIANAPOLIS:

BERRY R. SULGROVE, STATE PRINTER.

1861.

OFFICERS OF THE HOSPITAL, 1861

COMMISSIONERS.

ANDREW WALLACE, *President*,
P. H. JAMESON,
J. W. MOODY.

RESIDENT OFFICERS.

SUPERINTENDENT.

JAMES S. ATHON, M. D.

ASSISTANT PHYSICIANS.

HENRY F. BARNEJ, M. D.,
JOHN M. DUNLAP, M. D.

STEWARD.

MOSES HUNTER.

MATRON.

MRS. SARAH A. POAGE.

COMMISSIONERS' REPORT.

To His Excellency,

Gov. O. P. MORTON.

In compliance with the provisions of the Statute we present our annual report for the fiscal year ending October 31st, A. D. 1861. For about one-half of this time the Institution has been under the control of our official predecessors, to whom belongs a share of the credit as well as responsibility of its management.

For the number of admissions, discharges, recoveries, deaths, and other like statistics, we refer you to the accompanying report of the Superintendent.

The average number of patients daily, for the year, has been 294, which is fully as many as can be properly cared for within the wards of the building.

The cost per capita per annum, exclusive of clothing and repairs of the building, has been one hundred and twenty dollars; inclusive of all outlays, about one hundred and forty dollars, which, as we are advised, compares favorably with the expenses of other similar Institutions.

During the past year a very considerable number of insane persons have been refused admission for the want of room. Not only humanity, but even-handed justice, requires of the State that she should make provision alike for all of this unfortunate class who

may seek an asylum under the ægis of her protection. The present demand for room and the prospective, for at least several years to come, can be met by the erection of the north wing of the building as originally designed. This important improvement has been often and earnestly urged upon our State Legislature, by the Superintendent and former Boards, with comparatively little effect. It would seem almost useless to add anything further at present; still, while the necessity is increasing with the growth of our population, we are not without hope that sooner or later the required provisions will be made.

In several respects the buildings are defective and in bad repair. The ventilation is very poor indeed. In damp weather, when the atmosphere is light, the stench within the wards from the water-closets is almost intolerable. The air is, at all times, impure, which, in part, at least, accounts for the unusual mortality among the patients during the past year. This condition can be remedied by what is termed a downward ventilation, which should be provided for by the next Legislature, whatever else may be left undone. The basement wards, occupied by unruly and incurable patients, are damp, dark and poorly ventilated. The urgent demand for room is the only excuse for their occupancy. The bathing fixtures and water-closets have been in very bad order for years. They should, by all means, be repaired. The report of the Superintendent shows that we have kept the full average number of patients during the past year; yet enough has been diverted from the appropriation for current expenses to make several costly and important improvements. In the same manner, by exercising rigid economy, we hope to be able to add several other much needed repairs and improvements during the coming year.

Formerly it was the custom to purchase the coal used each year early in the season, deferring the payment until after the first of the next November. It was necessary to procure the supply early so as to give sufficient time to haul it advantageously from the coal yards in the city to the Hospital; and payment was deferred until the next fiscal year come in, because the coal received the summer before had already been paid for from the appropriation for the current year. Thus the purchase was necessarily on long time, and, consequently, on unfavorable terms. In short, the means for the supplying of coal was a year behind the demands of the Institution. To obviate this difficulty an appropriation of two thousand dollars for coal was made

by the Legislature when it last assembled, by which means we have purchased a supply for the present year on the most favorable terms. For the future we shall be able to pay promptly from the current fund, without inconvenience to other interests of the Institution.

The yield of the farm and garden has been large and profitable. The Superintendent is of opinion that the amount of our tillable lands should be increased.

At our August meeting the Superintendent resigned, to take effect at the close of the fiscal year. We had been advised previously by him of his intention. Subsequently Dr. James H. Woodburn, of Indianapolis, was appointed to fill the vacancy. These gentlemen are both quite well known throughout the State. We deem a personal notice of either of them at present unnecessary.

The Superintendent commends highly his subordinate officers for the faithful and efficient discharge of their various duties.

Hoping that what we have thus briefly submitted may meet your approval, for further details we refer you to the report of the Superintendent.

Respectfully,

ANDREW WALLACE, *President.*

J. W. MOODY,

P. H. JAMESON, } *Commissioners.*

SUPERINTENDENT'S REPORT.

To the Board of Commissioners:

GENTLEMEN:—I have the honor to lay before you my Annual Report of the affairs of this Institution for the fiscal year which has just closed.

The number of applications for admission is	258
Number of patients admitted	214
Number of patients refused for want of room.....	44
Number of patients under treatment during the year	511
Remaining in Hospital Oct. 31, 1860.....	297
Admitted this year.....	214
	511
Total under treatment.....	511
Cured during the year.....	114
Died during the year.....	27
Discharged improved.....	24
Discharged unimproved.....	45
Discharged, eloped.....	1
Number remaining in Hospital Oct. 31, 1861.....	300
Average daily number in Hospital during the year.....	294
Total number of patients admitted to the Hospital since it was opened, now thirteen years.....	2188
Total number discharged cured for the same period.....	1025

Annual appropriation for support and treatment of patients.

Appropriation for current expenses.....	\$35,000 00
Cost per capita per annum.....	120 00
Cost per capita per week.....	2 31
Appropriation for furnishing iron bedsteads.....	1,000 00
Appropriation for furnishing mattresses and repairing roof, &c.....	700 00

The Institution is clear of debt, and the bills for current expenses are settled every month.

HEALTH OF THE INMATES.

There has been no prevailing disease among the patients, though the list of mortality is larger than usual. This is attributable to the weakened physical condition in which a large number of patients are admitted to the Hospital. The practice of reducing the insane in order to assuage their malady, still prevails to a very injurious extent in every part of the country. The larger majority of cases require the opposite treatment.

The Iron bedsteads manufactured by Mr. John G. Smith, of Indianapolis, for which he deserves great credit for the faithful manner in which he performed his contract, fully meets my expectations. They are just the right kind of bedsteads for a Hospital. They are durable and safe, and should, as a matter of economy, if for no weightier consideration, be duplicated.

BOILER AND WASH HOUSES.

The repairs absolutely necessary in the Engineer and Washing Departments required an outlay of over six hundred dollars. The furnaces were burnt out and crumbling to pieces. They were taken down and put up anew. The Wash-House received many useful repairs which have added much to the facility of properly conducting that department. Though the house is improved, yet it is, at least, nothing but a decaying concern, which ought to be torn down and one equal to the work to be done built in its place. The expenses for the above named improvements were borne by the current fund. It is to be hoped, for the future good of the Institution, that the

Board will never be compelled to draw upon this fund for means to make improvements, when humanity demands that a separate appropriation should be made, which shall leave no doubt as to the amount for the actual support and treatment of patients.

The appropriation for matrasses was advantageously invested.

The repairs on the roof have done much to benefit it, but still it requires more attention to secure it from the inroads of drenching rains.

The plastering on the ceilings throughout the building requires patching. The rain has run through the defective roof, and destroyed and the soiled plastering on the upper rooms, while the decaying floors below let the water through so as to damage the lower ceilings.

The roof and floors, as well as the ceilings, need repairing.

The water closets and bathing apparatus also require repairs.

The wooden floors should be relaid and securely covered with lead. Time and use have rendered the repairs asked for absolutely necessary.

MORE ROOM NEEDED FOR PATIENTS.

The unusual number of patients refused admission this year is sufficient evidence that there is not room enough in the institution to accommodate all who are pronounced unsafe in the community.

The constitution contemplates provision for every insane person in the State, and humanity demands that each one should have an equal right to the benefits of treatment. The institution should be enlarged so as to provide for those persons insane from the effects of epilepsy.

I sincerely hope the day is not far distant, when Indiana shall have an asylum for all the insane of every class and condition within her borders.

FARM.

The farm has yielded all the vegetables necessary for the support of the household. More than three thousand dollars worth were raised the past year, making a clear saving to the State of that amount.

Besides having fresh vegetables always on hand, the great advantage of the farm lies in the opportunity it affords the patients for healthful exercises.

The farm should be enlarged instead of diminished, as proposed by some very wise, but I think mistaken statesmen. It is easy for mere politicians to theorize especially when the theory may advance certain interests, but practical experience in the management of the insane teaches, that an institution for the treatment of the insane can hardly have too much land connected with it for cultivation. Much may be done to reduce the expenses, while the labor necessary to produce vegetables greatly benefits many of the male patients.

SUPPLY OF WATER.

The supply of water is ample, but it is so very much impregnated with lime that the iron and leaden pipes everywhere in the house are being filled with deposits.

Artesian well water would remedy this evil, and I most respectfully recommend that an appropriation be asked for to progress with the well which is already one hundred and forty-nine feet deep. The apparatus is in perfect order and may be easily applied at any time.

Two hundred dollars per annum is sufficient to pay the expenses of repairing the tools. The employees who are necessary for the care of the patients may be employed to perform the entire labor. It is to be very much regretted that the Artesian well was suspended, and especially for the paltry sum of two hundred dollars. I still believe that water can be reached at a depth of two hundred feet from the surface.

The value of such a well, one which shall supply the Institution with an abundant quantity of soft water, is almost incalculable. Besides this consideration, it would test the practicability, at the public expense, of procuring water, by means of wells of this description, in this and similar localities in our State.

BASEMENT WARDS.

I have called the attention of the Board of Commissioners so often to the condition of the basement wards, that it hardly seems appropriate to repeat here the old complaint, that they are defective in all the appliances for properly treating the insane.

I hope you may be able to induce the next Legislature to make appropriations sufficient to remedy the evil.

GAS FOR LIGHTING THE HOSPITAL.

The mode of lighting the Institution is by means of oil lamps, which is attended with great danger to the building.

It is to be hoped that you will be enabled to procure appropriation for the purpose of supplying gas instead of oil, for lighting. Besides the imminent danger attending oil lighting, the oil is very frequently spilled upon the floors, and moreover the carbon from the burning oil soils the ceilings and furniture of the wards.

DAILY AVERAGE NUMBER OF PATIENTS IN THE INSTITUTION FOR THE PAST YEAR.

The daily average number of patients in the Hospital for the year has been *two hundred and ninety-four*. The cost per capita per annum, one hundred and twenty dollars, exclusive of clothing, or about *one hundred and forty* including repairs, furnishing and clothing.

RESIDENT OFFICERS.

Doctors Barnes and Dunlap, Mr. Hunter and Mrs. Poage, have faithfully performed the duties pertaining to their positions.

Dr. Barnes, after six years services as Assistant Physician, and Mr. Hunter, after more than five years services as Steward, retire in a few days from the Institution.

It affords me great pleasure on this occasion to bear testimony to the eminent manner in which these gentlemen conducted their several departments.

We return our acknowledgements to the following editors and publishers for their newspapers and periodicals. These gifts are anxiously sought for by the patients, and are perused with avidity and profit.

A List of Newspapers and Periodicals sent to the Hospital, gratuitously.

ESTIMATE FOR THE ERECTION OF THE NORTH WING.

Tables A and B are transferred from our annual report for the fiscal year ending October 31, 1858, to the General Assembly. The estimates were made by a practical architect, and are based upon the cost of the South Wing, which is understood to serve as a model for the North Wing. I reproduce the tables for information, as well as for convenience, &c.

TABLE A.

Estimate of what the North Wing will cost.

Stone and brick work, carpenter work, plastering, painting, cast iron window-sash, glass and glazing, slating, and lead for Hips.....	\$51,000 00
Heating apparatus, cast iron soil pipes, hoppers, urinals, connecting old heating apparatus with new, converting old dining rooms into sleeping apartments, offices, &c., making the necessary changes in the rooms connecting the old with the new building, and ventilating old water closets	19,000 00
Lead for bathing and water closet establishment, and plumbing work, including water closets and bathing in center building, &c.....	10,000 00
	<hr/>
	\$80,000 00

TABLE B.

Cost of building Bakehouse, Washhouse, with rooms in second and third stories for Sewing Room, Bed Rooms, Chapel, Library and Reading Rooms, for the Indiana Hospital for the Insane.

Excavations	\$409
Foundation Flagging.....	300
Rubble Masonry	3,300
Lime Stone Flagging for Floors.....	2,600
Stone water table, windows and door sills.	1,000
	<hr/>
	\$7,604 00
Brick and Brick Work.....	6,637 00
Concrete and Cement for Floors.	343 00

Materials and Labor for two Ovens.....	\$385 00
Carpenters' Work, Lumber and Hardware.....	7,655 00
Slate Roofing.....	\$900
Gutters and Conductors.....	251
Window Glass.....	160
Pumbing.....	1,800
Cast Iron Soil Pipe.....	176
	————— \$3,287 00
Plastering.....	\$1,064
Painting.....	725
Water Cistern in Tower.....	275
Washing Machinery.....	1,000
Ventilating Ducts and Registers.....	————— \$3,339 00
	————— \$29,330 00

A few more days and then my connection with this Institution, as Medical Superintendent, ceases. More than eight years of my life have been consumed in the treatment of the insane; and although the position affords the broadest field for the exercise of human kindness, yet it is attended with arduous and constant labor and the most intense anxiety, from the commencement to the ending of the year; but the consciousness of having been the means of relieving hundreds of the insane, and restoring them to family and friends, clothed in their proper minds, make amends for all my trouble.

In conclusion, I sincerely hope that nothing may transpire during your administration to arrest the present prosperous condition of the Institution.

Very respectfully,
 JAMES S. ATHON,
Superintendent.

AUDITOR'S REPORT.

OFFICE OF AUDITOR OF STATE,
Indianapolis, Nov. 4th, 1861. }

The following amounts have been drawn from the Treasurer of State, as shown by the books in this office, said amounts have been drawn since November 1st, 1860:

For Iron Eedsteads.....	\$1,006 25
For Bedding.....	499 82
For Coal.....	1,000 00
For Repairs.....	236 17
For Current Expenses.....	38,368 04
	\$41,110 28
Total	

There was appropriated—

For Iron Bedsteads.....	\$1,000 00
For Bedding	400 00
For Coal.....	2,000 00
For Repairs.....	300 00
For Current Expenses.....	35,000 90
	\$38,700 00
Total.....	

There has also been paid in by the Superintendent

	3,808 42
--	----------

Total amount..... \$42,508 42

Showing a balance in favor of the Institution of thirteen hundred and ninety-eight dollars and fourteen cents.

This may not be the exact amount, as during the past summer there has been such a press of business that errors may have crept in, and we are now comparing our books with the Treasurer of State, and in the course of a few days we will be able to give the exact amount.

Then again, the expense of the Institution for November, December, and January are not to be taken from the gross amounts of the appropriation made by the Legislature of 1861. The expense for these three months was nine thousand five hundred and four dollars and fifty-one cents, which should be taken from the appropriations, and the balance will show the resources of the Institution for 1861.

Respectfully,

ALBERT LANGE,
Auditor of State.

Per W. C. LUPTON, *Deputy.*

MISS A. A. DYER, *Music Teacher*.
MISS E. A. DAWSON, *Handicraft Teacher*.

TRUSTEES' REPORT.

To His Excellency, O. P. Morton,

Governor of the State of Indiana:

The following is respectfully presented as the Fifteenth Annual Report of the Board of Trustees of the Indiana Institute for the Education of the Blind.

The undersigned, President and Trustees, having by the last general assembly, under the act of the one next preceding, approved March 5th, 1859, been elected as the Board of Management of the State Institute for the Blind, held their first meeting at the office of said Institution on the 3d of April last, and assumed the charge of the establishment in accordance with the provisions of the law.

At this meeting Mr. T. A. Lewis was elected Secretary of the Board for one year, at a salary of \$100. The condition of the Institution was also examined into by the Board, and the President appointed as a committee to visit it during the recess of the same. Some amendments were made to the By-Laws, and sundry accounts presented by the Superintendent, were allowed, after which the Board adjourned.

They again met on the first of May following, as well as on the first Wednesday of each month succeeding, as required by the By-Laws, allowing sundry accounts as shown in the report of the Secretary, and transacting such other business as came before them.

At their July meeting, which took place on the 3d of that month, the Board, after transacting the usual monthly business, proceeded to the election of a Superintendent in place of the then incumbent, Dr. James McWorkman, whose term of service was to expire on the 30th of September ensuing. Mr. W. H. Churchman, then in charge of the Wisconsin Institute for the Education of the Blind, was thereupon chosen as Superintendent of this Institution for a period of four years from and after the first day of October following.

On September 4th, at the regular meeting of that month, Dr. McWorkman resigned the charge of the Institution for the remainder of his term, and arrangements were made for Mr. Churchman to enter at once upon duty.

At the same meeting, the newly installed Superintendent, as provided for by law, made the following nominations for assisting officers during the ensuing year, which were confirmed by the Board:

Mr. G. M. Ballard,	Teacher in Literary Department.
Miss M. S. Larned,	“ “ “ “
Mrs. H. Moore,	“ “ “ “
Mr. L. S. Newell,	“ “ Music “
Miss. A. A. Dyer,	“ “ “ “
Mr. S. McGiffin,	“ “ Male Work Department.
Miss E. A. Dawson,	“ “ Female “ “
Mrs. Jane Marshall,	Matron.
Dr. J. M. Kitchen,	Physician.

As mentioned in the Superintendent's report, hereto annexed, the lady appointed as Matron was removed by death in the latter part of October, and another was soon after engaged informally to supply her place, until a proper time should arrive for making a permanent appointment. In the loss sustained by the inmates of the Institution in the sudden death of Mrs. Marshall, the Trustees fully sympathize with them, as they feel persuaded, with the Superintendent, that she bade fair to make a valuable officer.

In the re-engagement of Mr. Churchman as the executive head of the Institution under their charge, the Board feel that they have cause to congratulate the friends of the blind youth of Indiana. His former labors in originating and building up the Institute, are well and favorably known throughout the State, and it is confidently believed that no other selection would in so eminent a degree have met the hearty approval of the people.

The Trustees upon examination, prior to the present session of the

school, found numerous repairs necessary upon the premises, as well as the furniture and apparatus, and also that the latter needed some replenishing. They accordingly authorized the Superintendent to put the Institution in as good running condition as its means would justify without exceeding the appropriation made by the last Legislature, and they have no hesitation in expressing the conviction that this duty has been judiciously performed. For a statement of what has been done in this regard, as well as of the reorganization of the different departments of the Institution, and the result of its workings since the date of the last Annual Report, the attention of your Excellency is respectfully directed to the accompanying communication of the Superintendent, which is herewith submitted as a part of this Report.

The expenditures, under the direction of the present Board, since the 1st of April, as well as those made by their predecessors prior to that time, are set forth in detail by the Secretary in his report appended hereto.

Below will be found an abstract of the same, exhibiting, under appropriate heads, a classified statement of the disbursements for various objects as follows, viz:

Expended for salaries of officers, including fees and mileage of Trustees.....	\$3,675 34
Expended for wages of employees.....	1,876 90
Expended for groceries and provisions.....	5,512 99
Expended for provender.....	45 08
Expended for fuel and lights.....	1,294 91
Expended for drugs, medicines, &c.....	175 53
Expended for school apparatus and musical instruments..	440 45
Expended for books, stationery and printing.....	320 64
Expended for tools for work department.....	145 98
Expended for material for work department.....	684 84
Expended for labor in work department.....	173 65
Expended for house furnishing goods.....	1,015 41
Expended for kitchen range, stoves and repairs on same..	473 16
Expended for horse-shoeing and repairs on vehicles and harness.....	132 51
Expended for clothing and traveling expenses of pupils..	966 84
Expended for construction and repairs on premises.....	940 93

Expended for postage and telegraphage.....	34 71
Expended for miscellaneous purposes.....	73 20
	\$18,013 07

The above statement, as well as the list of warrants detailed in the Secretary's report, shows the total amount of the allowances by the Trustees during the year to have been eighteen thousand and thirteen dollars and seven cents (\$18,013 07); while the accompanying statement of the Auditor of State shows the actual payments by the Treasurer, on account of the Institution, to have been eighteen thousand and fifty-eight dollars and forty-eight cents (\$18,058 48), or \$43 41 more than the sum of the allowances by the Trustees. This discrepancy seems to have arisen from the presentation and payment of outstanding warrants for allowances of the previous year.

The Auditor's statement also shows an overdraft by the Institution on the Treasury of two thousand two hundred and fifty-eight dollars and nine cents (2,258 09) at the beginning of the year, November 1st, 1860, which was increased to four thousand six hundred and seventy-two dollars and seventy-nine cents (\$4,672 79) at the close of the first quarter of the same. This overdraft occurred before the Institution came into the hands of the undersigned, and may have been unavoidable under the circumstances which existed at the time it was made; but, without meaning to reflect in any manner upon the course of their predecessors, the present Board beg leave to say that it is their firm determination not to allow the expenses of the Institution, in any event, to exceed the appropriations made for its support, as they believe such a step would be in direct opposition to the intention of the Legislature. Nor do they believe that the present or prospective condition of the Institution will call for a repetition of such a course.

From the statement of the Auditor heretofore referred to, it will be seen that of the appropriation of sixteen thousand dollars (\$16,000) for the support of the Institution from February 1st, of the present year, to February 1st, 1862, added to the sum of one thousand one hundred and ninety-six dollars and four cents (\$1,196 04) refunded by counties on account of advances for pupils' clothing, there remains in the State Treasury to the credit of the Institution at the date of this report a balance of five thousand eight hundred

and thirty dollars and sixteen cents (\$5,830 16.) Adding to this amount the sum of one thousand two hundred and nineteen dollars and eighty-three cents (\$1,219 83), being his legal allowance to meet current expenses and receipts from various sources, we have a total of seven thousand and forty-nine dollars and ninety-nine cents (\$7,049 99) applicable to the support of the Institution to February 1st, 1862. That this amount is amply sufficient to meet all expenses during the period named the Trustees cannot entertain a doubt.

In conclusion, the Board would express their conviction that the present condition and future prospects of the Institution, under their charge, are such as to encourage in a high degree the hopes of the immediate friends of the blind youth of the State, as well as the people at large who have so long and cheerfully contributed to its support.

Respectfully submitted,

ANDREW WALLACE, *President.*

JOHN BEARD,
WM. M. SMITH, } *Trustees.*

Respectfully submitted,

T. A. LEWIS, Secretary.

November 1st, 1861.

SUPERINTENDENT'S REPORT.

To the Board of Trustees:

GENTLEMEN—The By-Laws of this Institution (Art. IV., Sec. 17) make it the duty of the Superintendent to present to your Board an Annual Report, embracing an account of the condition and progress of its several departments, of the course of instruction pursued, and of the health and general improvement of the pupils, together with suggestions for the advancement of the objects of the Institution.

It therefore devolves upon the undersigned at this time to make such Report; but as his *present* connection with the establishment has existed for only a limited period, and as his predecessor has left on file no formal record of its operations from the date of the last annual report to that of the relinquishment of his charge, a period of about ten months, it is found impracticable for the present incumbent to give you a complete history of the condition and progress of the several departments during the year just closed, as contemplated by the By-Laws. He feels called upon, however, to gather such items of information as are accessible to him, and submit them for your consideration as follows, viz:

The assisting officers during the last session of the school, which closed, nominally, on the last Wednesday in July, were mainly the same as indicated in the Fourteenth Annual Report.

Their names and positions were as follows :

Mr. G. M. Ballard, Teacher in Literary Department.

Miss E. W. Bowman, Teacher in Literary Department.

Miss L. M. Morley, Teacher in Music Department.

Mr. M. C. Holman, Instructor in Male Work Department.

Miss E. A. Dawson, Teacher in Female Department.

Mrs. J. McWorkman, Matron.

L. Dunlap, M. D., Physician.

In addition to the above named regular officers, Mr. L. D. Taylor, a graduate of this Institution, and Mr. Edward Hines of this city, were employed during portions of the session to aid Miss Morley in the Music Department ; while in the Female Work Department, the instruction of the pupils was participated in by the Matron and some of the older girls.

On the 30th of March, Dr. Dunlap resigned his post as Physician, and Dr. J. M. Kitchen was appointed to serve in the same capacity during the unexpired portion of the term for which the former was elected.

About the 1st of June, Miss Bowman also resigned, in consequence of failing health, I believe, and as the session was then so far advanced, no one was employed to fill out the remnant of her term.

Of the manner in which the several officers above named discharged the duties of their respective positions, it is of course not for me to say ; but from the tenor of the last report of my predecessor, it is fair to presume that their labors met the entire approval of that officer.

The whole number of pupils in attendance at different times during the last session, I find to be seventy-six. Of these eight were graduated at its close, leaving the names of sixty-eight on the roll who were entitled to return at the commencement of the current session.

The following are the names of those who were graduated as above stated :

George S. Dunlap.....Vigo county.

Wm. T. ToombsScott county.

Joseph M. Perry.....Marion county.

John StutzmanElkhart county.

Robert CopeJefferson county.

Rebecca Sedam.....Johnson county.

Naomi EwingHendricks county.

Mahala French.....Wabash county.

AUDITOR'S STATEMENT.

Trustees of Indiana Institute for the Blind:

SIRS—Below find abstract of account of your Institution for the fiscal year ending Oct. 31, 1861:

Amount overdrawn, Nov. 1, 1860.....	\$2258 09
Amount expended during first quarter ending Jan. 31, 1861..	6692 60

Total.....	\$8950 69
------------	-----------

Appropriation for 1st quarter ending Jan. 31st...	\$4000 00
Current Receipts.....	277 90
	\$4277 90

Amount overdrawn, Feb. 1, 1861.....	\$4672 79
Appropriation for 1861.....	\$16,000 00
Current Receipts to Oct. 31, 1861.....	1,196 04
	\$17,196 04
Amount expended to same date.....	11,365 88

Balance unexpended, Nov. 1, 1861.....	\$5,830 16
---------------------------------------	------------

Which is the amount for your support till Feb. 1, 1862.

Yours truly,

ALBERT LANGE,
Auditor of State.

Per W. C. LUPTON, *Deputy.*

your approbation, continue to receive that care which its importance demands as an efficient means of promoting in our pupils that ability for self-dependence which should be the highest aim of all practical educators of the blind.

The following is a condensed statement of the financial operations of the Work Department, as derived from the accounts of the same, from the date of the last annual report, Nov. 1, 1860, to the commencement of the current session, Oct. 7, 1861 :

DR.

To value of raw materials on hand at the beginning of the year, as per last report of the Superintendent.....	\$600 00
To amount of bills receivable at the beginning of the year, as per last report of the Superintendent.....	200 00
To paid for raw materials during the year, as per certified accounts	684 84
To amount paid pupils for overwork during the year as per certified accounts.....	173 65
To amount of bills payable Oct. 7, 1861.....	20 85
To paid salary of Instructor in Work Department.	500 00
	<hr/>
	\$2,179 34

CR.

By receipts for manufactured articles during the year. as per accounts of Superintendent.....	\$434 21
By value of brooms used in house during the year.....	30 00
By amount of bills receivable, Oct. 7.....	457 99
	<hr/>
	\$922 20
By balance.....	1,257 14
	<hr/>
	\$2,179 34

The above statement, without taking into account the cost of tools and fixtures, which are assumed to be yet on hand in good working order, shows a balance of twelve hundred and fifty-seven dollars and fourteen cents, (\$1,257.14) against this department; for which deficit it must be borne in mind, the present management is in no way responsible.

Feeling assured, from previous experience in this and other Institutions of the kind, that the work department should be self-sustaining, I have made such changes in its organization and management

as cannot fail, I think, to produce this important result in the future. These will be explained in a subsequent paragraph.

Having briefly narrated above, to the best of my knowledge, the leading facts in the history of the Institution during that portion of the year which preceded the time at which it came under my charge, it now remains to lay before you an account of its operations during the remainder of the year which closed on the 31st ult.

The regular term for which I was elected as Superintendent commenced on the 1st of October just passed; but as my predecessor resigned the charge of the Institution on the 4th of September preceding, I entered upon duty at that date, as provided for by your Board, and arranged with our newly appointed Matron to assume the charge of the domestic concerns shortly thereafter.

The following are the names of the persons nominated by me, and confirmed by your Board, as assisting officers during the current year:

Mr. G. M. Ballard, Teacher in Literary Department.

Miss M. S. Larned, " " " "

Mrs. H. A. Moore, " " " "

Mr. L. S. Newell, " " Music "

Miss A. A. Dyer, " " " "

Mr. S. McGiffin, " " Male Work "

Miss E. A. Dawson, " " Female " "

Mrs. Jane Marshall, Matron.

Dr. J. M. Kitchen, Physician.

Mrs. Marshall entered upon her duties as Matron on Sept. 10th, some three weeks before the commencement of the regular term for which she was appointed, and continued to discharge the same with marked ability until the 26th of October following, when she was removed by death after a short but severe illness. During her brief stay among us, she evinced rare qualifications for the post which had been assigned her, and bade fair to make a valuable officer. Her loss is mourned by the entire household, to whom she had endeared herself by kindly sympathy and conscientious devotion to the work she had engaged in.

No regular appointment has yet been made to fill the place thus vacated by the untimely death of Mrs. Marshall, but we have succeeded in engaging the services, for the time being, of Mrs. E. J. Price,* a lady of excellent qualifications, who will, without doubt prove

*Mrs. Price has since been regularly appointed as Matron.

Of the sixty-eight whose names were retained upon the roll as just mentioned, sixty-two have returned at the present writing, the remainder being detained at home for various causes.

Adding to this number twelve new pupils who have entered since the commencement of the current session, we have seventy-four as the number now in actual attendance; and from present indications we have reason to believe that ere long this number will be increased to upwards of eighty.

In this connection, allow me, in the hope of your being able to devise some means of correcting the evil, to direct the attention of your Board to the very great irregularity which prevails among the pupils of this Institution as to their attendance during the session of the school. Many are in the habit of remaining at home for weeks and even months after the close of the summer vacation, while others insist, without a sufficient reason, upon leaving school long before the regular termination of the session. This evil has always existed here to a greater or less extent, but of late years, it seems to have greatly augmented. It were needless to occupy space here in setting forth the disadvantages which accrue, not only to such delinquent pupils themselves, but likewise to the school as a whole, for it must be obvious to any one that no school can progress creditably without prompt attendance on the part of its pupils.

In many institutions of this kind scholars are not received at any other time than at the commencement of the session, and after having entered upon their studies are not permitted to leave, excepting in cases of emergency, until after the closing examinations. This course may, by some, be deemed unnecessarily rigid, but unless the evil complained of can be abated in some milder way, I am not sure but it would be our best policy to adopt it. We might almost as well close our school entirely as permit a continuance of the existing irregularity. I leave the matter with you and trust that it will receive your earnest consideration.

In the Literary Department the following studies were pursued during the last session, viz: Orthography, Reading, Writing, Arithmetic, Geography, Grammar, Algebra, Chemistry and Geometry.

Of the progress of the pupils in these branches it is not for me to speak; but I venture nothing in assuming that their advancement must have been somewhat impeded by the want of an adequate supply of appropriate apparatus and a deficiency in the number of teachers employed. The variety of the former was not only limited,

but many of the articles on hand had been rendered comparatively useless by long and hard service.

In the Music Department instruction was given to most of the school in singing and pianoforte practice, while a few received lessons at times upon several other instruments. Here, too, the progress of the pupils must have been considerably retarded by an insufficiency in the number of pianofortes and other musical instruments, the supply of these being proportionately much smaller than is usual in other institutions of the kind.

In the work Department the manufacture of corn brooms was the only trade followed by the males last year, the other branches which were pursued during the earlier days of the Institution having been sometime since abandoned.

The number of brooms manufactured in the course of the session was 612 dozen, all of which had been disposed of before the undersigned assumed the charge of the Institution.

The principal industrial branches taught to the female pupils were plain sewing and knitting, but some attention was likewise paid to the manufacture of various articles of bead work.

Of the number and value of the articles made in the way of bead work and knitting, no account seems to have been kept; but I have been furnished with a list of the articles of needle work executed, which is here inserted, viz:

Sheets.....	69	Shirts.....	30
Pillow Cases.....	50	Chemises.....	19
Bed Spreads.....	25	Drawers, pairs.....	31
Comforts.....	14	Pants, pairs.....	2
Bed-ticks.....	3	Dress and Under Skirts.....	92
Window Curtains.....	5	Sacks.....	8
Towels.....	49	Aprons.....	57
Napkins.....	157	Handkerchiefs hemmed.....	111
Table Spreads.....	12	Havelocks.....	6
Toilet Covers.....	16	Sundry articles mended.....	109

The above list is very creditable to both instructress and pupils, evincing a commendable perseverance in the acquirement of the important art of sewing, which, to the blind girl, is far more difficult of attainment than the more showy, but less useful, branches which frequently claim the largest share of attention in institutions of this kind.

This feature of the industrial department deserves, and will, with

The plan heretofore pursued in the conduct of the work-shops of this Institution, as is the case in most others of the kind, has been to employ one or more instructors upon salary, and furnish them with the necessary tools and materials, the Institution receiving the manufactured wares, and applying the proceeds of their sale towards the defraying of the expenses of the Department; but as the receipts have for several years past fallen far short of the expenditures, the shops have been this year organized upon a different basis, with a view to make them, if possible, self-sustaining. Arrangements have been made with a gentleman of long experience in the manual instruction of the Blind, by which he furnishes all materials at his own cost, and instructs the pupils in the several occupations pursued, without other compensation than their labor for the instruction imparted. The manufactured wares are of course disposed of by him for his own benefit. Thus the Institution is free from all expense excepting for tools and fixtures and the warming of the shops, as well as from the disadvantages arising from the accumulation of stock in dull times.

Besides the pecuniary saving to be effected by this plan, it is believed that the pupils will be more thoroughly instructed than they would have been by a continuance of the former system of management. The reasons for this will be readily appreciated when we take into account the stimulating influence of self-interest upon all who are engaged in business operations of whatever kind. It is believed also, that not only a higher degree of skill and dexterity will be obtained by the workmen, but that they will likewise be taught a more judicious economy in the use of materials, a lesson of no small importance to those who would depend upon their trades for a livelihood.

In the reorganization of the household department, much has been done which is calculated to systematize and facilitate its operations, as well as to enhance the comfort and well being of the pupils; while at the same time an important reduction in its current expenditures has been effected.

The furniture, which needed some replenishing and much repairing, has been put in such condition as to need comparatively little additional outlay in that direction for some time to come.

The buildings, too, with the exception of re-painting, other than the roof of the main edifice, have been put in thorough repair; and

much has been done to improve the appearance of the grounds, particularly in the rear of the principal building.

There are yet several minor improvements needed upon the grounds, however, and the entire premises are suffering for want of paint, all of which it is hoped will be provided for by you during the next season, should our present means justify the necessary expenditure.

One of the greatest necessities in an Institution like this is a method of warming and ventilating, which is at once efficient, safe, healthful and economical in use. After much laborious investigation, an apparatus was devised and introduced into the building soon after its erection, which, when fully completed in all its appliances, gave certain promise of meeting all the requirements just enumerated, but from subsequent mismanagement through ignorance of its design and construction, it was almost wholly destroyed and then abandoned for the more unsatisfactory, dangerous and unhealthful method of warming by close stoves with little or no ventilation. This method had been in use for some years, when the undersigned was called to resume the charge of the Institution a few weeks since, and one of his earliest cares was to devise some way of substituting a better one for it.

But in the absence of adequate pecuniary means for either restoring the original hot water apparatus, or introducing the more expensive steam fixtures, for which a boiler-house and smoke-stack were erected several years ago, this was found to be no easy task. After some reflection, however, an expedient was hit upon by which some of the materials of the old apparatus and the buildings of the contemplated new one might be made, at a comparatively small cost, to subserve at least a temporary purpose until an appropriation could be secured for the construction of something more permanent. This temporary plan has been carried out, and thus far fully meets our expectations. The building is now for the most part comfortably warmed by a single fire, which, being located externally to it in the boiler-house before mentioned, is free from danger either to the building or its inmates. The principle adopted is, in general terms, as follows: A mild air-warming furnace of novel construction, with a great extent of heating surface, is located in said boiler-house, and by means of a large ventilating fan, the atmosphere to be warmed is driven through this into large ducts which convey it to the original air chambers in the cellar of the building, whence it ascends through the flues leading

herself in every way worthy of the appointment, should she decide to become a candidate.

The remaining officers above mentioned, assumed their respective charges at the appointed time, and thus far give entire satisfaction in the discharge of the duties of their several positions.

The school was opened this year, as formerly, on the first Monday in October, but the sessions will hereafter commence on the first Wednesday after the 15th day of September, as provided for in your recent amendment of the By-Laws. The close of this, as well as of future sessions, will take place on the last Wednesday in June, a month earlier than has been customary heretofore. This change in the time of our annual sessions was found desirable in order that the vacations might occur during the warmest portion of the summer season.

In the several departments of the Institute, a thorough re-organization has been effected, with a view to ensuring the greatest possible efficiency in each with the least expenditure of means, and we flatter ourselves that a marked improvement is already visible throughout the whole.

The school has been classified under three separate divisions corresponding to the number of teachers employed, and an appropriate course of study selected for each; while important additions have been made to the stock of apparatus, which greatly enhances our facilities for instruction.

Among the new articles of apparatus may be mentioned a couple of dissected maps of the United States, showing the recently established territorial boundaries, and a large double map of the hemispheres, all of which were manufactured under our own direction and at the least practicable cost. The map of the hemispheres is constructed after the manner of the most approved physical maps, showing, in bold relief, all of the more important features of the earth's surface, with proportionate elevations, as laid down by the best physical geographers, and is believed to be the best work of the kind yet executed. For the perfection of this map we are mainly indebted to the skill and geographical knowledge of Miss M. S. Larned, one of our teachers, under whose immediate superintendence the work was done.

The courses of study adopted the current year for the different divisions above mentioned, are as follows:

JUNIOR DIVISION.

Orthography, Reading, Writing, Arithmetic, Geography and familiar lectures on common things.

INTERMEDIATE DIVISION.

The same as the preceding but more advanced, with the addition of English Grammar.

SENIOR DIVISION.

Higher Arithmetic, Algebra, Rhetoric and Composition, Natural Philosophy, History, Physical Geography, and Moral and Mental Philosophy.

In addition to the studies above mentioned, nearly all of the pupils receive instruction, to a greater or less extent, in vocal and instrumental music, and all have the benefit of occasional lectures on miscellaneous topics. They are also furnished regularly with reading by the teachers and other officers, from newspapers, periodicals, and a variety of biographical, historical, and other works.

In the Music Department, valuable additions in the way of pianofortes and other instruments, have also been made to our stock of appliances for musical instruction and practice.

With these the privileges of our pupils in this Department have been materially improved.

In addition to a full choir, composed of nearly all of the pupils of both sexes, steps have been taken towards the re-establishment of an instrumental band, which will greatly enlarge the field of knowledge to those who are fitted by natural endowment and inclination to adopt the profession of music as a means of honorable independence.

In the industrial department, the females are being instructed in the same manual arts as were pursued during the last session, and their progress has thus far been in every way commendable.

To the trade of broom-making, the only one pursued by the male pupils for several years past, have been added those of brush-making, mat-making and carpet-weaving. Something is also being done in the bottoming of cane-seated chairs, and the art of matrass-making will likewise be introduced, so soon as arrangements can be made for the accomplishment of this end.

from the same to the different apartments. Means are of course provided for charging the rarified air with the requisite amount of moisture as it passes through the ducts.

After an absence of eight years from this Institution, during most of which time I was engaged in a similar field elsewhere, I have resumed the onerous duties of its superintendency with no abatement of interest in the work, and I beg leave to assure you, gentlemen, that while I have the honor to remain associated with you in my present capacity no effort shall be wanting on my part to make this one of Indiana's noble monuments of enlightened liberality, a blessing indeed to that class of her afflicted children for whose sole benefit it was erected.

Allow me, in conclusion, to tender to your Board my grateful acknowledgments for the honor conferred by your selection of me for this important trust, as well as the confidence manifested thus far by your cheerful and unanimous co-operation in every recommendation which it has become my duty to submit for your approval. To maintain this confidence unbroken throughout our future intercourse will be my highest aim.

Respectfully submitted,

W. H. CHURCHMAN,

Superintendent.

C I R C U L A R .

LOCATION AND OBJECT OF THE INSTITUTION.

The Indiana Institute for the Education of the Blind is located at Indianapolis, the capital of the State, and occupies a healthful and beautiful site in the northern part of the city.

It has for its object the moral, intellectual and physical training of the young blind of both sexes residing in the State.

It is, therefore, an educational establishment, and not an asylum for the helpless, or a hospital for the treatment of disease.

It was founded in the year 1847, conformably to an act of the Legislature of the State, from which body it receives its entire support, through the medium of direct appropriations made upon estimates of its wants, furnished by the officers in charge.

ORGANIZATION AND MANAGEMENT.

The Institution is organized under three separate departments: the School, the Industrial and the Household, each performing its respective office of ministering to the improvement and comfort of the pupils.

The general government of the Institute is entrusted by the Legislature to a Board of Trustees, elected by that body, while the immediate control and management of its several departments are confided to a general Superintendent, chosen by the Board.

The Superintendent is assisted in the school and industrial departments by competent instructors, and in the household department by

an experienced Matron, who administers the domestic concerns, having the immediate supervision of the female pupils when out of school, and the direction of the several domestics in the performance of their allotted duties. These assistant officers also receive their appointment from the Board, upon the nomination of the superintendent, but are directly responsible to the latter for the faithful discharge of their respective trusts.

PLAN OF EDUCATION.

The plan of education pursued at the Institute is designed to be thoroughly practical, comprehending all that is necessary for such a development of the mental and physical powers of the Blind, as is best calculated to place them upon an equal footing with seeing persons in their capacity for usefulness and self-maintenance.

The course of instruction, therefore, embraces, in addition to the ordinary routine of school branches, the science and practice of vocal and instrumental music, several appropriate mechanic arts, moral and religious culture, and such other training as serves to establish becoming personal habits, energy of character, business tact, etc.

DOMESTIC ARRANGEMENTS.

In the household department, every means that experience can suggest for the promotion of the health and comfort of the pupils, is provided. Among these are commodious, well-ventilated dormitories, school rooms, hospitals and various other apartments; spacious halls, piazzas and out-door promonades, suitable for exercise in all kinds of weather; ample arrangements for cold, warm and shower bathing; good wholesome food and comfortable beds; prompt medical advice, with other necessary attention in case of sickness; and, above all, kind, sympathising friends, whose duty and pleasure it is to minister to the moral and physical wants of their unfortunate charges, striving, in each of their various relations, to supply to them all the desirable comforts of home.

AGE OF PUPILS.

From ten to fourteen is the most favorable age for entering the Institute, provided the pupils have judicious care and training at home prior to that age. But as this is not always the case, and as there are many who lose their sight after that age; or, having lost it

earlier, do not find an opportunity of going to school at the proper time, the regulations of the Institute allow of the admission of all proper subjects who are not under eight or above twenty-one years of age.

It must be borne in mind, however, by the friends of blind children, that though they have the privilege of sending them to the Institute at a later period than the one mentioned as the best, yet it is of the highest importance that they should be sent within said period; for as they grow older their neglected powers lose their susceptibility for cultivation, rendering the training more and more difficult until they become wholly incapacitated for receiving such an education as will fit them for a life of usefulness, independence and happiness. It is not uncommon to witness results of this kind, arising out of the morbid tenderness with which a blind child is regarded by his friends, they being unwilling to entrust him at the proper age to the care of strangers, lest some harm should befall him. Indeed every year's experience but serves to indicate more clearly the lamentable prevalence of this unjust neglect, as there are constantly applying for admission into the several institutions of the country those whose melancholy lot it is to lead a life of hopeless ignorance and dependence, but who might, with proper training in early youth, have become happy and useful members of society, maintaining themselves comfortably and respectably.

TERM OF INSTRUCTION.

This is not limited to any definite number of years, but is determined in each individual case, by the acquirements of the pupil and the consequent fitness for graduating. The length of each one's term will of course depend upon his aptness to learn, and the extent of the course pursued.

SCHOOL SESSION.

There is one session of the school in each year, commencing on the first Wednesday after the 15th day of September, and closing on the last Wednesday in June following, leaving a vacation of twelve weeks, during which time the pupils have an opportunity of visiting their homes and replenishing their clothing.

ADMISSION OF PUPILS.

Any person desiring the admission of a pupil into the Institution,

must address the Superintendent, giving definite and truthful answers to the following questions, viz :

- 1st. What are the names and post office address of the parents or guardians of the person in question?
- 2d. Are such parents or guardians legal residents of the State of Indiana?
- 3d. What is the name of the person for whom application is made?
- 4th. What is the date of his or her birth?
- 5th. At what age did he or she become blind, and from what cause?
- 6th. Is the degree of blindness sufficient to prevent the acquirement of an education in a school for the seeing?
- 7th. Is the person of sound mind, and susceptible of intellectual culture?
- 8th. Has he or she ever been a pupil in any Institution for the Blind; and if so, what one?
- 9th. Is he or she free from bodily deformity, and all infectious diseases?
- 10th. What is the moral character of the applicant?

Upon the receipt of proper answers to the foregoing queries, the parties interested will be notified of the result of their application; and no person should be sent to the Institute in advance of such notification.

GENERAL REGULATIONS.

1st. No person of imbecile or unsound mind, or of confirmed immoral character, will be knowingly received into the Institute; and in case any person shall, after a fair trial, prove incompetent for useful instruction, or disobedient to the wholesome regulations of the Institute, such pupil will be thereupon discharged.

2d. No charge is made for the boarding and instruction of pupils from the State of Indiana, but all are expected to come provided with an adequate supply of good, comfortable clothing, which must be replenished from time to time as it becomes necessary.

3d. The stock of clothing should embrace suitable articles for both summer and winter, and a sufficient number of each kind to admit of the necessary changes for washing and repairing.

4th. All of the clothing must be sent in good order and condition, not only upon the first entrance of the pupil, but also at each subsequent return from home after the vacation.

5th. Each article should also be distinctly marked with the owner's name or initials, in order to prevent confusion or loss.

6th. In cases where the parents or guardians of pupils are unable through indigence to supply them with the necessary clothing, the same is provided by the Institution, and the amount of its cost collected by law from the respective counties in which such pupils reside.

7th. Applicants of suitable age and capacity from without the State, will be received as pupils and furnished with boarding and tuition at the rate of \$125 00 per annum, payable half yearly in advance.

8th. It is important that all of the pupils of each year should be present at the commencement of the school session, and remain until its close. This will therefore be expected of them unless prevented by sickness or other emergency. In case of non-compliance with this rule on the part of any pupil without a sufficient reason, his or her right to the privileges of the Institution, will, at the discretion of the Superintendent, be forfeited.

9th. Persons visiting the pupils from abroad, cannot be accommodated with boarding and lodging at the Institute during their stay in the city.

10th. All letters to the pupils should be addressed to the care of the Institute in order to insure their prompt reception.

ANNUAL REPORT

OF THE

AUDITOR OF STATE

OF THE

STATE OF INDIANA,

SHOWING THE RECEIPTS AND DISBURSEMENTS OF THE TREASURY DEPARTMENT FOR THE FISCAL YEAR ENDING OCTOBER 31, 1861.

TO THE GOVERNOR.

INDIANAPOLIS:

BERRY R. SULGROVE, STATE PRINTER.

THE UNIVERSITY OF CHICAGO

ALDOUS HUXLEY

OFFICE OF THE AUDITOR OF STATE, }
Indianapolis, Nov. 1, 1861. }

To His Excellency, O. P. Morton,
Governor of the State of Indiana:

SIR:—I have the honor to transmit herewith to your Excellency my annual report for the fiscal year ending October 31, 1861, agreeably to the act of February 3, 1853, to provide for the annual reports of State officers and others.

Yours, very respectfully,

ALBERT LANGE,

Auditor of State.

REPORT.

A GENERAL STATEMENT of the Receipts and Expenditures during the fiscal year commencing Nov. 1, 1860, and ending Oct. 31, 1861.

RECEIPTS.

There was remaining in the Treasury	
Nov. 1, 1860, as per Ledger.....	\$238,712 76
Suspended debt of the Treasury deduct-

	<hr/>
	\$19,000 00
Amount expended to Oct. 31, 1861.....	19,876 10
Amount overdrawn November 1, 1861	\$876 10

By reference to section 10 of an act, approved May 31, 1861, at the extra session of the Legislature, it will be seen that the unsettled

accounts for Public Printing, executed according to law previous to the year 1861, when ascertained and certified to be correct by the Secretary of State, shall be allowed and paid out of the money appropriated for the years 1861 and 1862.

This will explain the overdraft in the account of Public Printing, which will be deducted from the appropriation of 1862.

INCIDENTAL.

FUEL AND STATIONERY.

Appropriation overdrawn November 1, 1860	\$4,586 49

INTEREST ON STATE DEBT.

The following statement shows the amounts of interest paid each year since the consummation of the arrangement with the bondholders:

In the year 1847.....	\$78,600	00
In the year 1848.....	183,730	00
In the year 1849.....	188,344	00
In the year 1850.....	188,595	00
In the year 1851.....	203,718	00
In the year 1852.....	199,784	00
In the year 1853.....	249,127	75
In the year 1854.....	298,255	52
In the year 1855.....	306,569	14
In the year 1856.....	316,674	34
In the year 1857.....	318,027	74
In the year 1858.....	317,092	63
In the year 1859.....	311,579	14
In the year 1860.....	309,548	09
In the year 1861.....	176,837	82

The interest falling due on the 1st January, 1861, had been placed to the credit of the State Agent on 31st October, 1860, but a large proportion of the fund, to-wit: \$125,000 had been raised by a loan from Winslow, Lanier & Co., which was repaid to them in May, 1861.

VINCENNES UNIVERSITY BONDS.

The amounts of interest which have been paid are as follows :

For the year 1855	\$1,967 55
For the year 1856.....	3,935 10
For the year 1857.....	4,085 10
For the year 1858.....	3,935 10
For the year 1859.....	3,815 10
For the year 1860.....	4,205 10
For the year 1861.....	3,845 10

The United States Government has refunded to the State of Indiana the sum of four hundred and fifty thousand dollars in six per cent. U. S. treasury notes. They were immediately sold in the city of New York at rates varying from 96 to 96 $\frac{3}{4}$ per cent., producing a total sum of \$432,639 30, and this sum was applied solely to the redemption of 6 per cent. Indiana war loan bonds. The bonds thus redeemed are numbered as follows :

From No. 126 to No. 405.....	280
“ “ 406 “ “ 547.....	142
“ “ 651 “ “ 680	30
“ “ 703 “ “ 708	6
“ “ 715 “ “ 744	30
Total.....	<hr/> 488

All of the denomination of one thousand dollars.

By a provision of the act authorizing the issue of these bonds, approved May 13, 1861, (Acts special session 1859, p. 19, section 5) it is made the duty of the financial committees of both Houses of the next General Assembly to destroy the bonds thus redeemed. But as they are coupon bonds, and without endorsement pass into

the possession of any holder, the State Debt Sinking Fund Commissioners did deem it proper to prevent their passing into the hands of unauthorized holders, by ordering that they should be canceled by punching through the body of each bond three holes, of a diameter of $\frac{1}{2}$ an inch, and running cross lines over each of the 39 coupons attached to each bond. They were accordingly canceled in this manner, and are now kept in the office of the Auditor of this State, awaiting their final destruction by the aforesaid Committees.

It is gratifying to say, that owing to the sagacity and foresight of the Loan Commissioners, the officers charged with the redemption of the bonds, were enabled to do so on terms very favorable to the State; that is to say, they paid for them only the same amount for which they had been sold by the State, varying from $87\frac{1}{2}$ to 88 9-10 per cent. per annum from the day of sale to the day of rendition, with the addition of interest at the rate of 7 per cent.

From a report, submitted to the Legislature at the extra session, it would seem that Governor Morton labored under the impression that the first \$100,000 charged to the "Military Fund" had been charged to the "Military Contingent Fund." Twenty thousand dollars of this being a loan to the General Government for the support of troops, made by the Governor, was properly charged to the "Military Contingent Fund." The rest was properly charged to the "Military Fund," as will appear from the vouchers on file at this office.

According to the quarterly reports of the Loan Commissioners made to this office, the bonds sold to this date amount to \$904,500, to-wit:

600 bonds of the denomination of \$1000.....	\$600,000
304 " " " " 1000.....	304,000
1 " " " " 500.....	500
	<hr/>
Total	\$904,500
And with the funds obtained by the State from the General Government there were redeemed.....	488,000
	<hr/>
Leaving outstanding on the 31st Oct., 1861.....	\$416,500

By an Act of the General Assembly of the State passed at the special session of 1861, (Acts of special session, page 46) the officers of State were authorized to make temporary loans for war purposes. This right they would willingly have foregone on account of the responsibility and trouble connected with its exercise; but the necessities of the treasury were repeatedly so urgent that the officers had to waive their reluctance. Loans were repeatedly obtained from Messrs. Winslow, Lanier & Co., of New York City, who with their ample means came to the assistance of the State; also from several of the Free Banks, and of the Branches of the Bank of the State

of Indiana. In every instance these loans were obtained upon the sole consideration of the payment of seven per cent. per annum.

The Auditor of State has ample materials on hand, to propose in accordance with law to the next General Assembly amendments of existing laws, and the passage of others, which he deems calculated to promote the public interest. All of which he reserves for a future Report, required of him before the meeting of the next General Assembly of the State.

STATEMENT NO. I.

SHOWING the Settlement with County Treasurers in detail, for collection of Revenue, School Tax and Sinking Fund Tax for the year 1861.

BANK DEPARTMENT.

The following statements exhibit the condition of the Free Banks of this State, from which it will be seen that there are seventeen Banks continuing under the law, and six voluntarily retiring their circulation for the purpose of closing business. The aggregate amount of securities held by this department for the twenty-three Banks, October 31, 1861, is as follows:

Indiana 5s.....	\$449,500
Indiana 2½s.....	478,846
Indiana 6s.....	62,000
Missouri 6s.....	230,000
California 7s.....	60,500
Louisiana 6s.....	100,500
Tennessee 6s.....	21,000
Pennsylvania 5s.....	1,000
North Carolina 6s.....	11,000
Georgia 7s.....	4,500
Michigan 6s.....	3,000
Kentucky 6s.....	2,500
Virginia 6s.....	5,000
United States 6s.....	30,000
Gold.....	20,000
Exchange.....	3,112
	\$1,482,458

The market value of the above securities is \$1,008,943, and the total circulation of the Free Banks is \$929,819, showing an excess of securities at their cash value of nearly *nine per cent.* above their total circulation.

The Free Banking law, as amended by the General Assembly, and approved March 9, 1861, gives a preference of five per cent. in favor

of Indiana stocks, requiring one hundred and five dollars of stock for each one hundred dollars circulation, while one hundred and ten dollars of stocks of other States is required; also requiring the Banks which have deposited other than Indiana stocks for security, to exchange them for the stocks of this State on or before the first day of January, 1863.

Several of the Banks have already availed themselves of this preference, making an increase of ten per cent. in favor of the stocks of this State.

It has been the unpleasant duty of the Auditor of State to call repeatedly upon the Banks for an increase of their securities or a corresponding decrease of their circulation. This was owing to the great fall in the value of stocks issued by States now in rebellion against the Government. I can, and hereby cheerfully bear witness, that with hardly an exception the requisitions issued by me were promptly complied with. The result is now manifest in the stability and safety of the Free Banks of the State, and in the fact that not one of them has given cause for the interference of the State Officers, to settle up their affairs.

AMOUNT and kind of securities held by the Treasurer of State on the 31st day of October, 1861, for the Free Banks of Indiana; also, Statement of Banks voluntarily withdrawing their circulation; Banks that have withdrawn their securities, and Suspended Banks.

BANKS CONTINUING UNDER THE LAW.

[Agreeably to an act of the General Assembly, approved March 11, 1861, the Auditor gave notice that the notes of suspended banks would be redeemed for ninety days longer at the same rates notes had been previously redeemed; after which a dividend would be declared in favor of holders of certificates for any unpaid balance, and the surplus, if any, would be surrendered to stockholders upon their filing a bond conditioned for the redemption of all outstanding notes. In accordance with which proceeds have been paid and surrendered, as shown in the statement following:]

ANNUAL REPORT

OF

THE COMMISSIONERS

OF

THE SINKING FUND

OF THE

STATE OF INDIANA.

TO THE GOVERNOR.

INDIANAPOLIS:

BERRY R. SULGROVE, STATE PRINTER.

1862.

Doc. J.—25.

REPORT.

OFFICE OF THE COMMISSIONERS OF THE SINKING FUND, }
Indianapolis, January 1, 1862. }

To His Excellency,

Gov. O. P. MORTON:

SIR:—Herewith is submitted the annual report of the Commissioners of the Sinking Fund of this date.

The last annual report showed that there were outstanding of bank bonds of the State—for the redemption of which, at their respective maturity, in 1864, 1865 and 1866, this fund is specially pledged—\$955,000 of the \$1,390,000 originally issued by the State.

Although there is no obligation of the State to redeem these bonds earlier than the period of their maturity, it has been deemed to be the first duty of this Board to purchase them whenever they could be procured at a fair discount; and therefore the purchasing of the \$435,000 heretofore reported has been effected at various rates, from 82 to 95 cents on the dollar, as is exhibited in detail in Table C of our last annual report.

Desiring to procure as many of the bonds as practicable before their maturity, as their redemption is the imperative obligation of this fund, a circular was issued by the Clerk on the authority of the Board, in New York, on June 19, 1860, offering to exchange, with

five per cent. premium, the Indiana five per cent. stocks held by the fund for the Bank Bonds of the State; or, if the owners preferred to receive cash, to give ninety-six cents on the dollar for all which would be offered.

At the time of our last annual report we had only succeeded in procuring, by exchange under said offer, \$19,000 of the Bank Bonds and to purchase \$5,000 of them.

But during the past year large amounts of these bonds held in Europe, by owners to whom these circulars had been sent, have been presented to Messrs. Winslow, Lanier & Co., our correspondents in New York, in compliance with our offer; and the sum required to purchase them being much beyond our means on hand, we were compelled to avail ourselves of the liberal offer of our correspondents above named to advance the necessary funds for us to comply with our proposal, at simple interest in New York, until the income of the fund would enable us to reimburse them. With our means and those thus afforded, we have purchased since the last report \$233,000 of the Bank Bonds at ninety-six cents on the dollar—making the whole amount of the bonds redeemed by purchase \$668,000, and leaving yet outstanding \$722,000.

The incoming means of the fund are so ample for the redemption of these bonds that with proper diligence we may expect that they will all be purchased before they fall due.

Our remaining indebtedness to Messrs. Winslow, Lanier & Co. for their advances for such purchases is \$105,918 13.

Under the law of the State, of May 13, 1861, directing this Board to purchase to the extent of the means on hand the six per cent. bonds issued under such law at par, this fund purchased on May 25, 1861, and paid for \$125,000 of such bonds retaining the interest therefrom running thereon to November 1, 1861, being \$3,187 50.

The amount of the Sinking Fund on this date over and above its liabilities (and computing the \$348,672 85 distributed to the counties as a proper part of the means of this fund, being the result of its earnings and dedicated to the same object of common school education to which this fund, when finally realized, is pledged) is three millions four hundred and eighty-nine thousand and eighty-five dollars and fifty-eight cents (\$3,489,085 58.)

We are entirely satisfied the net amount of the fund will considerably exceed this sum, if it is judiciously husbanded, by the expira-

tion of the period when the last of the Bank Bonds will be due and payable.

The amount of the fund loaned on mortgage, including unpaid loans to the State institutions for Insane and Blind and the State University, is \$1,614,820 34, being \$52,995 49 less than the amount at our last annual report.

Table E, in our last annual report, exhibits the amount of the respective loans in the several counties, since which times no loans have been made.

The amount received during the last year from the assignees of the branches at Fort Wayne, Madison and Indianapolis of the late State Bank of Indiana, as further dividends on the stock owned by the State in such braeches, is \$9,422 63.

The amount of money on hand in the fund is \$8,998 93, as is shown with the other items of its condition in the statement herewith submitted.

HORATIO C. NEWCOMB,

President.

JOHN F. CARR,

B. McCLELLAND,

NATHANIEL KEMP,

JEFFERSON HELM,

Commissioners.

STATEMENT of the Condition of the Sinking Fund, January 1, 1862.

JAMES M. RAY, Clerk.

ANNUAL REPORT

OF

THE BOARD OF TRUSTEES

OF THE

WABASH AND ERIE CANAL,

FOR THE YEAR 1861.

TO THE GOVERNOR.

INDIANAPOLIS:

BERRY R. SULGROVE, STATE PRINTER.

1862.

REPORT.

To His Excellency, O. P. MORTON,

Governor of the State of Indiana:

The Board of Trustees of the Wabash and Erie Canal, respectfully report:

That the navigation of the Canal south from Terre Haute to Evansville, as stated in the last Annual Report of the Trustees to the Generally Assembly, has been virtually abandoned, the Trustees having no means to sustain the same.

The contractors who undertook to keep that part of it between Evansville and Newberry feeder dam, 95 miles, in repair, and maintain the navigation, were discouraged by the small and inadequate revenues derived therefrom, and being unable to supply the deficiency either from their own means or by the contributions of the people along the line, they failed to keep it up, and that part of this division between the Newberry feeder dam and Pigeon Reservoir, about 65 miles, is not navigable, and the structures on it, particularly the east abutment of White River dam at Newberry, and the river lock at this dam, are fast going to decay, and are now in an unsafe condition. The Trustees have deemed it proper to notify the public of this fact by notice in the newspapers circulating in that section of the country.

That part of this division between Pigeon Reservoir and Evansville in which the water still remains, is useless, except for a small local traffic.

The contract for the middle division, between Newberry and Terre Haute, having expired in May last, no other persons have offered to take the same, the tolls proving wholly inadequate to support it, with the exception of that part, about 25 miles, between Terre Haute and Eel River feeder dam, which has been taken by Messrs. Miller and Hedges, for the tolls and the sum of one thousand dollars paid to them by the city of Terre Haute.

The Birch Creek Reservoir remains unrepaired, and of course the balance of this division is rendered useless.

The Trustees are gratified to state that the navigation of the eastern division of the Canal, from Terre Haute to the Ohio State line, has been maintained during the year by the contractors, under their agreement made with the Trustees in the spring of 1859. This agreement has been heretofore fully reported to the Legislature, together with the reasons for making the same.

The Trustees are satisfied that the plan adopted by them has been the means of saving this portion of the canal from utter ruin, and continuing to the people of the Wabash Valley this important outlet to market for their produce. The existing contract for repairs and maintenance of the navigation by its terms is limited to the 1st of January, 1863, when it expires. The Trustees, at their recent session, considered what action would be necessary to insure the maintenance of the navigation after the expiration of the existing contract, and provide for contingencies which would occur before the meeting of the General Assembly in 1863.

They were satisfied that to contend with the railroad competition, they must enlist private interest and enterprise in the work. The Trustees are expressly prohibited from having any interest, either direct or indirect, in boats navigating the canal, and they could not therefore, in the face of this provision, apply any of the means of the trust to this purpose.

The direct competition of the Wabash Valley Railroad with the business of the Canal has been more active during the last two years than in previous years, for the obvious reason that the managers have been encouraged to expect that by such means parties would be discouraged from building freight boats to be used on the Canal, and consequently all reliance upon it as a means of transportation would

be destroyed. Acting on this theory, they have refused to entertain proposals from the contractors to establish, for mutual interest and support of Canal and Railway, a remunerating tariff of freights on produce shipped for Toledo from common points on the Canal, such as Attica, Lafayette, Delphi, Peru, Wabash, &c., and in 1860 they seem to have adopted and put in operation a systematic plan for destroying the Canal. The Trustees refer to the extracts from the report of the Canal Superintendent for a more full and particular statement of the measures referred to. The Trustees submit the facts for the consideration of the State authorities.

This Canal has been constructed by the State at a great cost, for which she incurred a heavy debt. The debt is yet outstanding and unpaid; for the payment of one half of it she pledged the tolls and revenues of the Canal, with a solemn covenant to protect them against any interference or diversion whatsoever. A corporation afterwards created by the State and acting under her authority, seeks to destroy the business, and of course the canal itself, by anomalous and extraordinary measures adopted with the avowed purpose of interfering with its business, diverting its tolls and revenues, and destroying it as a channel of trade for the public in competition with the road; and this, too, under powers derived from the State.

It is surely to be regretted that such limitations were not interposed as would have effectually protected the interests of the State and her creditors in the Canal against such ruinous and unwise competition.

In view of these facts, and the absence of any action on the part of the Legislature instructing them, the Trustees deemed it their duty to adopt such measures for preserving the navigation of this portion of the Canal, as in their judgment would best effect that end.

They have therefore made a contract with Hugh McCulloch, Alfred P. Edgerton, and Pliny Hoagland, of Fort Wayne, for the repair and maintenance of the navigation of the Canal between Terre Haute and the Ohio State line, to take effect from the termination of the existing contract at the close of this year, until the 1st of July, 1873, and during all that time "to keep and preserve the same in good order with all its structures." Their compensation for services and risks is based upon the revenues to be derived from the Canal itself. The contract will be duly reported to the General Assembly.

It is believed that these contractors, with the aid and co-operation of the people and business men living along the line of the Canal in

the Wabash valley, who have the deepest interest in it, will be able to maintain the navigation, and finally establish it on a permanent basis. That their efforts will receive the fostering care and encouragement of the Legislature and the people of Indiana, cannot be doubted. They are citizens of the State, enjoying the confidence of the public for their known business experience, integrity and responsibility.

The Trustees paid during the year out of the funds on hand six per cent. on the bondholders' advance, applied in interest, leaving the principal in tact. A further distribution will be made as soon as the Supreme Court of the United States decides the case pending before it, affecting the balance of funds on hand. This decision is expected in May or June next.

The statement of receipts and disbursements shows a balance in hands of contractors for the Eastern Division on the 1st of December of 1861, of \$35,317 22

This apparent balance is subject to the following payments:

Repair abstracts for the whole Division for October and November, which had not been forwarded for payment up to 1st December, 1861, estimated at.....	\$4,000 00	
Repairs by contract, yet to pay.....	2,500 00	
Salaries due on 1st of January, 1862, of Superintendents, collectors, &c., about.....	1,800 00	
Amount due Trustees up to 1st Jan., 1862...	1,487 50	
		9,787 50

Leaving balance on 1st of January, 1862, of..... \$25,529 72

This amount will be subject to payment of all winter repairs, which will be heavier than last winter, probably amounting from \$13,000 to \$15,000; to the expense of opening Canal in the spring, under favorable circumstances, not less than \$5,000; to salaries for 1st quarter of 1862, \$1,800; and amount payable to Trustees, \$1,487 50; and to the renewal of certain structures which, according to the terms of the agreement, should have been renewed during the year, but were delayed, with the approval of the Chief Engineer, for want of funds. These subjects of expenditure will require the total amount on hand.

CANAL LANDS.

During the year ending 30th November, 1861, the Trustees have sold, of the lands in the Vincennes district, 3,500.37 acres for the sum of \$7,429 59, being a very large decrease on the preceding year, and greatly less than the sales of any year since the lands were first brought into market. The disturbed condition of the country is a sufficient explanation of this decrease in the demand for lands.

The Trustees append to this report a tabular statement of the lands sold during the year, showing the quantity of acres of each class, and the total cash receipts for each month; also a statement showing the quantity of lands unsold, the class, county where situated, and total valuation, from which it will be seen that there are yet unsold 98,583.80 acres, valued at \$202,255 25.

The total receipts of the Land Office, East of Tippecanoe, for the year ending 30th November, 1861, were \$2,827 92.

The total receipts West of Tippecanoe for same period, were \$4,845 14.

The total valuation of principal and interest due, and of unsold lands East and West of Tippecanoe, as nearly as can be computed, on the 1st December, 1861, is

East of Tippecanoe	\$16,108 94
West of Tippecanoe.....	24,969 42
	<hr/>
Total	\$41,078 36

The suspended debt stands as at last report. For a detailed statement of the condition of the Canal and the cost of repairs from the State line to Terre Haute, the Trustees refer to the report of the Chief Engineer, which is herewith transmitted.

The Trustees transmit tabular statements, showing the amount received for tolls and water rents at the various offices during each month of the year; also, statements exhibiting the sales and receipts at the land offices for each month of the year; also, a statement of the receipts and disbursements during the year ending the 1st December, 1861, showing the amounts received and disbursed by the Trustees; also, by the contractors for the Eastern Division. The Middle and Southern Divisions being out of repair, no receipts or disbursements have been made through the Trustees.

The balance of cash in the hands of the Trustees on 1st December, 1860, was.....	\$53,707 04
Add to this the amount received from all sources during the year.....	22,314 51
	<hr/>
Making.....	\$76,021 55
The amount paid out during the year is.....	57,964 02
	<hr/>
Leaving balance on hand 1st Dec. 1861, of.....	\$24,057 53
From which must be deducted for interest on advance due but not yet called for, and for arrears of judgment yet payable	6,500 00
	<hr/>
Leaving actual balance.....	<u>\$17,557 53</u>

All of which is respectfully submitted.

CHARLES BUTLER,	} Trustees.
RICH'D RALEIGH,	
THOS. DOWLING,	

TRUSTEES' OFFICE, WABASH AND ERIE CANAL, }
Terre Haute, December 16th, 1861. }

REPORT OF CHIEF ENGINEER.

OFFICE OF CHIEF ENGINEER, }
Terre Haute, Dec. 12, 1861. }

*To the Board of Trustees of
Wabash and Erie Canal:*

GENTLEMEN:—I herewith submit a brief statement in regard to the operations on the Canal for the year just closed.

EASTERN DIVISION—STATE LINE TO TERRE HAUTE.

The navigation was opened about the 20th of April and continued until the first week in December. The interruptions have not been frequent or of long continuance. No unusual flood in the streams has occurred during the year. Indeed, since the damaging flood of June, 1858, there has been a remarkable exemption from great rises in the Wabash and its tributaries, and this favorable turn in the seasons has produced a marked influence upon the amount of expenditure for annual repairs.

The wooden structures in progress of reconstruction at the date of my last annual report, were completed, excepting the north guard lock at Wild Cat, which will be rebuilt during the present winter.—Two lift locks of wood east of Fort Wayne, one at Huntington, the plank facing of the two rough stone locks at Lockport, the upper cribs of Guard Lock at Delphi Feeder, and the small aqueducts over

Crooked Creek and Mill Creek are the principal renewals of wooden structures to be made this winter. During the low water of next summer it will be necessary to rebuild the north abutment of the Wabash dam at the Forks, both abutments of Clear Creek dam, with some renewal of the slopes of both these dams; also the lower cribs of Guard Lock at Delphi feeder, the north abutment of Pittsburgh dam, with head gates of the water power race, the Deer Creek guard lock, the south abutment of Wild Cat dam, and the Sugar Creek guard lock, with partial renewals of some other structures of less magnitude.

At the Maumee bluff, one-half mile east of Fort Wayne, the abrasion of the floods, for over twenty years, has so worn away the strip of natural bank separating the Canal from the river as to leave barely sufficient earth for the towing path. A portion of this river-washed bank has heretofore received a permanent stone protection in the shape of a "rip-rap" wall, and about 12 chains in addition must be protected in the same manner during the next summer.

In my estimates for repairs from 1859 to 1863 inclusive, which accompanied the annual report of the Trustees, dated January 11th, 1859, and which was made a basis of the existing contract for repairs on this division, provision was made for a contemplated gradual improvement of the navigation by "extra cleaning and deepening west end of summit level," "extra cleaning and widening canal above Attica," "cleaning out bog above Covington," and "extra raising the banks below Granville." The proportionate expenditure for these objects contemplated for the years 1859, 1860 and 1861 has not been made by the contractors. The rebuilding of perishable structures, with other pressing demands upon the repair fund, has thus far exhausted the entire accruing revenue and water rents. As the contractors were not expected to make a permanent advance of means, these desirable, though less urgent, improvements have been deferred. A part of this work is to be done this winter.

The revenues of this division for the past three years of the repair contract has been judiciously and economically applied in making the most essential repairs, leaving on hand at this time little more than a prudent reserve fund for probable necessary winter and spring repairs, and the proper opening of navigation for the season of 1862.

I take pleasure in noticing the public spirit in which the authorities in some of the counties, and individual citizens in other cases,

have assumed the erection of bridges over the Canal for State and county roads, and for streets in towns and cities. When fully assured of the fact that the revenue is only sufficient for repairs essential to navigation and the permanent maintenance of this great work, so important to the country, other counties will surely adopt the same course, and our scanty income will be relieved from this unjust burden.

In considering the question of sufficient revenue to maintain this division in future years, the most discouraging feature is the gradual diminution of boats. Neither the Trustees or the repair contractors, being carriers, the providing of the means of transportation, unlike the usage of railroads, is left to the promptings of individual, unassociated enterprise, which, under the active railway competition, has proved too timid to meet the requirement. The number of boats passing the Fort Wayne office, including all that made one or more trips; was, in 1854, three hundred; in 1858, one hundred and seventy-five, and in 1861, less than one hundred. The number built during the past few years by no means equals the loss by the regular decay. Unless boat-building shall be resumed with more activity, it will very soon be found that the entire fleet of boats, if kept fully employed, will not pay toll sufficient to meet the repairs. The case suggests the propriety of some associated effort, not only for boat-building, but for the increase of canal trade by other means. It will be found, upon inquiry, that boat stock during the two years past has been fully remunerative.

The material alleviation of the difficulty in keeping up the supply of water on the division between Lafayette and Perrysville, since the destruction of the Williamsport side-cut by the flood of June, 1858, fully verifies the professional opinions before expressed, as to the exhaustive effect upon the main line, of that and other proposed side-cuts, and indicates the action of the Trustees in resisting the construction of these works.

The expenditure for repairs on these divisions during the year ending October 31st is as follows:

Expense of repairs, with the irregular force.....	\$11,929 06
Repairs of breaks in embankments, aqueducts, dams, &c.	1,306 97
Cleaning out canal in spring.....	3,924 27
Rebuilding wooden locks, dams, abutments, &c.....	6,678 09

Rebuilding and repair of bridges for State and county roads.....	561 00
Lock tending.....	3,658 46
Salaries of Superintendents.....	4,200 00
	<hr/>
Total.....	\$32,257 85
Of which there belongs to the general head of extraordinary repairs.....	7,239 09
	<hr/>
Leaving as the cost of ordinary repairs.....	\$25,018 76

For the proportion expended on each district, see table A, appended hereto.

MIDDLE DIVISION—TERRE HAUTE TO NEWBERRY.

The contract with C. Rose and others for keeping in repair this division, expired on the 20th of May last. The tolls proving wholly inadequate, the parties did not desire its renewal. Messrs. Miller & Hedges have since undertaken to maintain twenty-five miles of this division, between Terre Haute and the Eel River feeder dam inclusive, for the tolls; they also receive one thousand dollars per year from the authorities of the city of Terre Haute as a further compensation. The Birch Creek reservoir remains unrepai red.

SOUTHERN DIVISION—NEWBERRY TO EVANSVILLE.

With the exception of about thirty miles between Pigeon Reservoir and Evansville, in which the water is still maintained, this division has received no attention from the repair contractors and is entirely useless. The breach at Prairie Creek aqueduct, reported last year, has not been repaired. This cuts off the supply of water thence to Pigeon Reservoir. One of the evils resulting is the suspension of the mill of Mr. Brett, two miles below the break. In May last, at the request of Mr. Brett, I visited that portion of the Canal with a view to counsel as to some mode of conveying over this breach water sufficient to run the mill. No plan was found practicable other than a complete repair of the Canal and aqueduct abutment, at a cost of about \$1,200. The owner of the mill at that time entertained the plan of making the repair through a local subscription, but it was not accomplished.

In my report of December, 1859, it was stated that the east abutment of the White River dam at Newberry required immediate renewal. The contractors having failed to rebuild it, serious damage to this work is apprehended. Without constant supervision and the regular application of means to its repair, no such work as a canal can long escape dilapidation. The river lock at this dam is in an unsafe condition.

Respectfully submitted,

J. L. WILLIAMS,

Chief Engineer.

EXTRACTS

FROM THE

REPORT OF THE CANAL SUPERINTENDENT TO THE TRUSTEES, DECEMBER, 1861.

“The season of 1860 opened by a phase in the management of the Railroad, perhaps necessary to its existence, but certainly unusual even in Railroad corporations. It sought to secure in its interest, at the several points of competition along its line, the business men having warehouses and therefore doing business upon the Canal, by renting and closing up or removing these warehouses to the Railroad, and offering to their owners such special facilities for transportation as would enable them to defeat all efforts at competition on the part of the remaining friends of the Canal; where, from the peculiar character of the locality, warehouses could not be removed, or the usual street market was nearest the Canal, a side track was laid by the railroad to the warehouse, and its business secured by some special privilege to the occupant.”

“At Huntington they removed from and across the Canal to the Railroad, a distance of nearly half a mile, at great expense, a large warehouse, owned and occupied by a Mr. Parviance, one of the most successful merchants and produce operators of the place, and they extended to him such facilities for purchase and shipment as enabled him to divert from the Canal the entire shipping business of the town. And although there yet remains other warehouses upon the Canal, the owners, not possessing the facilities of Mr. Parviance, are unable to compete with him.”

“At Lagro, the next point of importance below, a side track has been laid to the Canal warehouses and the largest portion of the business secured to the road.”

“At Wabash, the road induced a Mr. Steele, the owner of a large Canal warehouse, and one of the avowed friends of the Canal, to close his warehouse and to do business in one upon the Railroad owned by the Company, and at rates of freight, I am advised, unknown to the public. But at this point their success was not as great as at Huntington and Lagro, for a large number of the most enterprising and liberal business men are yet the friends of the Canal and do business upon it.”

“At Peru efforts were made to withdraw business men from the Canal by propositions for special rates of freights, removal of warehouses and otherwise, and by becoming, as I have been advised, purchasers in the open market, and competitors with those who were unwilling to accept the terms proposed or who preferred to do business upon the Canal.”

“It is questionable whether this unjust competition at this point was profitable to the Railroad. I believe it has been discontinued.”

“At Logansport the effort was more successful, for nearly all the business of the town is now done upon the Railroad.” “There, as at Wabash, gentlemen have believed it to be for their interest to close their Canal warehouses against Canal business entirely.”

“At Lafayette the distance of the Railroad from the center of business and the usual market place for produce from the country, and the proximity of the Canal to it, have rendered the efforts to close Canal warehouses unprofitable; and we have therefore received from that point a fair share of the business.”

“At Attica, where the Railroad crosses the Wabash river and leaves the Canal entirely, the road has been successful in withdrawing the business from us; scarcely a boat load of grain having been shipped from that point to Toledo after their arrangements were perfected; and to induce shippers of freight from points below Attica, destined for Toledo or eastward, to ship by Railroad from Attica, instead of by Canal, the entire distance, the road has offered special rates of freight, and it would have been successful in diverting from the Canal a large share of the pork, lard, &c., packed at Covington and points below, but for the imposition of the same tolls to Attica, as were charged to the State line of Ohio.”

“I may here remark that while the road has been thus active in its effort to destroy the Canal, and secure to itself the immense carrying trade of the Wabash Valley at such prices as it might thereafter choose to establish, I have heard no business man, however large his

interest upon the Canal in warehouses or other property, express any hostility to the really permanent interests of the road, as they all believe that both Railroad and Canal are necessary to the best interests of the country, and that neither should be destroyed nor compelled to do business at other than remunerating rates."

"The Railroad having, by the means I have stated, secured to its interest the shippers as far as it could be done, but not to the extent it desired or expected, the next effort was to destroy the boat interests by fixing such low competing rates of freight as would leave no profit to the boats nor even to itself."

"The season of 1860 was devoted to securing as large a share of the shipping interest as possible. That of 1861 to the destruction of the boating interest."

STATEMENT of Receipts and Disbursements by the Board of Trustees of the Wabash and Erie Canal, from the 1st day of December, 1860, to the first day of December, 1861.

8
SECOND ANNUAL REPORT

OF THE

BOARD OF CONTROL

OF

The Northern Indiana State Prison,

FOR THE YEAR 1861.

TO THE GOVERNOR.

INDIANAPOLIS:

BERRY R. SULGROVE, STATE PRINTER.

REPORT OF THE BOARD OF CONTROL.

OFFICE BOARD OF CONTROL, NORTHERN INDIANA STATE PRISON, }
Michigan City, December 15, 1861. }

To his Excellency, O. P. MORTON,
Governor of the State of Indiana:

The undersigned, Board of Control and *ex-officio* Directors of the Northern Indiana State Prison, beg leave to submit the second Annual Report of the progress of the construction and operation of said prison, for the fiscal year ending December 15, 1861, embracing, however, a period of twelve and one-half months, from the 1st of December, 1860.

On the 22d day of March, 1861, the undersigned received from the former Board of Control, the books, papers, &c., belonging to said prison, and at once entered upon the discharge of the duties connected therewith, by the election of HUGH HANNA President of the Board.

At the time of our coming into office, Samuel C. Kirkpatrick, Esq., was acting in the capacity of Superintendent and *ex-officio* Warden, having received his appointment from our predecessors, after the resignation of C. W. Seely, Esq. It was the desire of our Board, on assuming control of the affairs of said prison, to elect our own officers for its management and operation; and accordingly, on the 27th day of March, 1861, an order was passed by the Board declaring the office vacant, by the removal of Mr. Kirkpatrick, and electing Hiram Iddings as the Superintendent and *ex-officio* Warden of said prison. Mr. Kirkpatrick declined to deliver into the possession of Mr. Iddings the books, papers and property of said prison, alleging his right to

retain his position by virtue of his appointment by the old Board; and denying the power of the new Board to remove him. Thus a conflict of authority at once existed between them, each claiming the right to control the management of said prison. It was finally agreed, however, that the question of the power of the Board to remove and appoint that officer, should be referred to the Attorney General for his opinion, each party contestant agreeing to abide by his decision. The Board submitted the question to the Attorney General, who presented his opinion in writing, sustaining the Board in their action in the premises, and all conflict at once ceased—Mr. Kirkpatrick transferring and delivering to the newly appointed officer all property belonging to the State, then under his control.

It was the desire of our Board, on assuming control and management of said prison to, so far as possible, expend the small appropriation made by the Legislature, so as to secure a greater safety of the convicts in said prison, who, at that time, were necessarily confined to two large apartments, thus making it exceedingly hazardous and difficult to enforce discipline, or to prevent the planning of insurrections, or means for escape therefrom. But we at once discovered that the means appropriated was totally insufficient to erect the cell house, or to make any progress in that direction. We therefore determined at once to proceed to the construction of the main wall and towers; the same, when completed, adding greatly to the security of the convicts, and the curtailing of the number of guards required to be kept for their security; and as soon as the proper material could be got together, and the yard graded and repaired, (rendered necessary by the action of the frosts and other causes during the winter,) under the efficient and energetic management of our Superintendent, Mr. Richard Epperson, to whom great credit is due for his untiring energy and perseverance in carrying on said work, we were enabled during the past summer to carry the wall and towers to the height of sixteen feet around the entire grounds, thus affording a much greater security to the safety of convicts who will necessarily be employed within the Prison walls during the construction of the Prison buildings. Of the character of the work done thus far, under the supervision and care of our Superintendent of Construction, Mr. Epperson, we will say that it is pronounced by all who have examined it of the first quality, and will not suffer by comparison with any work of a similar character in the United States.

We had inferred from the Report of the old Board, that the Clay Pit heretofore used for the procuring of clay for the manufacturing of brick was owned by the State, but upon examination and inquiry we found it was owned by private parties, who had sold the clay to the State for such prices as might be agreed upon.

We had an interview with the parties as soon as we discovered the State had no interest therein, and found them disposed to charge a much greater price for clay than we thought the interest of the State would justify.

We were, however, compelled by the necessity of the case to pur-

chase such an amount of clay as would keep the convicts employed until examinations could be made and other clay found suitable for the manufacturing of brick of a good quality. We succeeded in purchasing of Hugh McCulloch, Trustee for the Pittsburgh, Ft. Wayne and Chicago Railway Company, eighty acres of land adjoining the clay pit heretofore used, on the line of the Michigan Central Railroad, in Porter county in this State, for the sum of four hundred and five dollars, on which there is a large body of clay of the first quality, and of an amount sufficient for all the purposes of the State for all time to come. It is estimated that the wood and timber on the land is of itself worth twice the price paid for the land. We have the clay pit opened of sufficient capacity for twenty-five cars, with a track well laid, of the first quality.

The Legislature, at its extra session, passed a law authorizing the transfer of two hundred convicts from the Prison at Jeffersonville to this Prison for the purpose of using such convict labor in its construction. The same act making such transfer, also provides that this shall be a Receiving Prison.

Upon an examination of the act itself, and after having taken legal counsel, the Board came to the conclusion that the law contemplated the office of Warden separate and distinct from that of Superintendent, as specified in the act passed by the Legislature authorizing the location of this Prison. And accordingly, on the 3d of June, 1861, the Board elected Hiram Iddings Warden of said Prison, and Richard Epperson Superintendent of Construction, both of which officers have discharged their respective duties with fidelity, energy, and efficiency.

By the act of the Legislature of last winter the sum of twenty-five thousand dollars was appropriated for the construction and support of said Prison for the year 1861, and a like sum for the year 1862.

At the extra session of the Legislature, the act authorizing and requiring the transfer of convicts to this Prison, appropriated the further sum of thirty thousand dollars to aid in the construction of said Prison and support of convicts.

This large influx of convicts, and the meagre and insufficient means of security, required considerable additional expense for clothing, bedding, supplies, &c., for their efficiency, comfort and security.

Some few of the convicts have escaped during the summer and fall, as will appear by the Report of the Officers of the Institution. But when the large number of convicts, and the means for their safe keeping and security are considered, and the additional fact that a large portion of the convicts are necessarily compelled to be worked in the clay pit a distance of 16 miles from the Prison, and in chopping of wood two or three miles beyond the Prison, it is reasonable to conclude that some would make an effort to escape, and that the recapture of all would be improbable.

Our Guards were selected from the best of our citizens, and all are men of intelligence and of industrious and temperate habits, and for

energy, resolution and bravery will compare favorably with the same number of men taken from any of the pursuits of life, and have well sustained the good reputation heretofore given them by the officers of the Institution.

The amount of the appropriations for the year 1861, at the General and Special Sessions of the Legislature, was fifty-five thousand dollars. The financial exhibit by the officers shows the amount expended during the fiscal year ending December 15, a period of twelve and a half months, to be \$60,987 11; a like amount having been drawn from the Treasurer of State.

This period of time embraces three and a half months of the operation of the fiscal year; under the old Board of Directors, the receipts and expenditures under each set of officers being exhibited separately, as will be seen by reference to the report of the Clerk and Warden herewith appended.

The Legislature, having elected us as the Board of Control, entrusted with the prosecution of the work of construction of the new Prison, and expecting from us an honest application of the money appropriated to the best interests of the State, we believe that a full examination of the financial report of the officers of the Institution, herewith appended, will show that we have endeavored to expend and apply the same with the greatest care and economy consistent with the many disadvantages under which we assumed control of the Institution, and the large expenses necessarily incurred in guarding so many convicts. Without the facilities of confining them in separate cells, the number of convicts averaging two hundred and twenty-five, confined in two rooms, absolutely required a large guard force to prevent insurrections from being planned and carried into execution.

For the purpose of a more full and complete statement of the manner in which we have applied the funds coming into our hands, and for which we are responsible for its faithful application to the purposes intended by the Legislature, the following statement becomes necessary: Total amount of the appropriation for the year 1861, \$55,000. The old Board of Control had drawn from the Treasurer of State before we came into office, out of our appropriation, the sum of \$6,298 73. The act of appropriation also provided for the payment of the January liabilities, which we paid to the amount of \$2,173 83, making the total amount thus paid \$8,472 56. There was also an account of Messrs. Lingle & Spring of \$436, for stationery furnished during the term of the old Board, which was paid without any affirmative action on the part of the present Board; also the further sum of \$400 75 paid for transportation of convicts, without having been passed upon by our Board. There was also paid the further sum of \$390 on salary account to the old Board, by the Auditor of State, under an order of Court, and in addition to the above the sum of \$250 65 was paid for transportation of prisoners, and \$363 32 paid to E. May for services as architect, rendered before we came into office, and allowed by our predecessors. We also have paid for gatage fees to discharged con-

victs, the sum of \$1200; leaving, of the entire appropriation properly applicable to construction and support of prison under the new Board of Control, the sum of \$43,463 72.

The detailed report of R. Epperson, Superintendent of Construction, of the amount and value of the work done, and materials on hand, estimating the same upon the basis of the contract of Messrs. Talbot & Costigan, shows in amount the sum total of \$42,994 14; by an examination of the schedule of personal property now on hand, it will show an excess over the inventory of March, when we assumed control of the prison, of \$9,963 40; thus showing at a glance that the work done, estimating the same at the prices paid Messrs. Talbot & Costigan, amounts to nearly the entire appropriation applicable to construction and support account. In a word, making the prison self-supporting for a period of eight and a half months, with a surplus to profit and loss account (material and use deducted,) of about seven thousand dollars.

During the present winter but little labor can be done with the convicts, as there are no shops suitable for working them during the cold weather, and the impossibility of leasing them to parties for manufacturing purposes, without furnishing on the part of the State sufficient shop room and facilities for so doing, while at the same time the expenses of support, guarding, &c., will continue.

It is to be regretted that the Legislature did not in their wisdom see fit to make a more liberal provision for the year 1862, as the large increase of convicts sent to this prison by the act passed at the Special Session will render the appropriation, of itself, insufficient for the ordinary and necessary expenses of the Prison during that period.

Economy and sound policy would suggest to all, who reflect upon the subject, the importance of a liberal appropriation for the speedy and energetic prosecution of the work, from the fact that the expenses of maintenance and support of prisoners, and the payment of guards and salary of officers, will continue and be a considerable expense to the State, whether the work of construction shall be vigorously prosecuted, or whether, for want of sufficient appropriation, the final completion of the prison shall be delayed for a longer period. Hence we would suggest to the Legislature the necessity and importance of an appropriation sufficient to complete, at an early day, the principal buildings, shops, &c., and thus place the prison in a condition to make the convict labor contribute largely to the support of the institution, by leasing the convicts to be used for manufacturing purposes; believing, as we do, that when the workshops and other buildings of the prison shall be completed, no difficulty whatever will be experienced in letting all the convict labor to advantage to the State, thus making the prison a source of profit instead of a tax upon the people for its support.

The plan of the prison adopted by the former Board of Control we consider one of the best; and so far as we have progressed with the work we have followed it, although when completed it will largely

exceed that contemplated in providing for the location of this prison. Yet we believe that a prison of the capacity of the plan adopted will necessary for the future wants of the State; and when completed will, in point of appearance, safety and convenience, compare favorably with any similar structure in the United States.

For a more full, explicit and detailed statement of the receipts and expenditures, and the business operation of said prison, for the fiscal year, we refer you to the able report in detail of our efficient and worthy Clerk, Charles F. Kimball, herewith appended. Mr. Kimball has been an active, accommodating and efficient officer, and has discharged the complicated duties of his office to the entire satisfaction of the Board and we believe with great credit to the State.

We beg leave respectfully to refer you also to the report of the Warden for information more in detail of the management, and other matters connected with his duties as such officer. Mr. Iddings has uniformly devoted his entire attention and care to the management of the Institution, and by his gentlemanly deportment and assiduous attention to the interest of the State, and the safety and comfort of the convicts, has, in an eminent degree, secured their good will and a desire upon their part to conform to the discipline of the prison, rendering it but seldom necessary to resort to the lash to enforce obedience.

We would not omit to mention in this connection Mr. Iven N. Walker, Deputy Warden, who is a faithful and energetic officer, always at his post of duty and ready to co-operate with the other officers with promptness and energy in the discharge of all the duties connected with his position, and as such officer, with the brief experience of eight and a half months, we consider him without a superior in the position in which he is placed.

We would also mention favorably Mr. Lewis Kimball, Steward of the Prison, who has discharged the duties of his position with care and efficiency in the department assigned to him.

We refer you, also, to the reports of the Chaplain and Physician, herewith appended, showing fully the management and results connected therewith, and to each of said officers we are under many obligations for the faithful and efficient manner in which they have discharged their respective duties.

In conclusion, we would state that when we entered upon our official duties in March last, many very embarrassing questions presented themselves for our action, among which were a large number of accounts and claims, presented for payment under contracts alledged to have been made and entered into by our predecessors, a majority of which we declined to take any action upon, from the fact that no funds were placed at our disposal for any purpose other than for support and construction; and in some instances we deemed the accounts not justly entitled to be paid by the State, as being made without authority of law, and detrimental to the interests of the State.

Of the two hundred convicts transferred from the prison at Jeffer-

sonville to this prison by the special act of the Legislature of last spring, it appears to have been the intention of the act itself to have given us as many mechanics suitable for the work of construction, as could be done under contracts then existing at that prison; the law providing that the Warden of that prison should designate the convicts thus sent. And of the number thus transferred to this prison, but a very few were mechanics of any description, and a large number of those sent us were men whose term of service had about expired, requiring us to pay out of our appropriation the sum of over twelve hundred dollars as gateage fees for discharged convicts, without having received but little if any benefit from their labor. An account was presented to this Board for allowance and payment, by the officers of the Southern Prison, the sum of about \$1,000 for clothing worn by the convicts who were transferred to this Prison from Jeffersonville. This account we declined to allow, for the reason that the State had already paid for the clothing thus worn by the convicts; and to have made payment of the account again would have taken that sum out of our small appropriation for construction purposes, and paid it to the Southern Prison, which had been liberally provided for by the appropriation of the State Legislature. Neither could we reasonably conceive that it was contemplated to send such convicts in a state of nudity, or in other apparel than that of prison costume.

Having thus briefly and explicitly presented the more prominent points of interest connected with the management of the Prison thus far, we respectfully submit the same, with the reports of the other officers hereto appended.

Yours, &c.,

HUGH HANNA,
JONAS VOTAW,
W. WILLIAMS,

Commissioners.

WARDEN'S REPORT.

OFFICE OF THE NORTHERN INDIANA PRISON, }
Michigan City, December 15, 1861. }

To Hon. HUGH HANNA, WILLIAM WILLIAMS,
and JONAS VOTAW.

GENTLEMEN:—I have the honor to submit the following statement of the general affairs of this State Prison.

The year closing with the 15th of December inst., has been fraught with more than the usual trials and changes attending State Institutions of this kind—indeed, it may be termed in its history “the era of investigation and change;” and, as these changes have had a marked effect upon its reputation and success, it may be proper to allude briefly to some of the circumstances attending them.

By appointment of the Board of Control, Mr. C. W. Seely held the position of Superintendent at the commencement of the fiscal year, December 15th, 1860.

On the 15th of January following Mr. Seely resigned, and Mr. Samuel C. Kirkpatrick was appointed to fill the vacancy.

During the month of February the Legislative Investigating Committee were in session upon the management of Prison affairs, and in March issued their report thereon.

On the 12th of March your Honorable Body were qualified, and on the 27th of March duly appointed me Superintendent in place of Mr. Kirkpatrick, removed. Then the question immediately arose as to whether the power invested in the Board of Control was competent to remove the Superintendent, and ex-officio Warden, or not—which question was duly submitted to the Attorney General of Indiana, J. G. Jones, Esq.

The decision of the Attorney General was to this effect—that but one officer was contemplated in *the law establishing the Prison*, viz., that of Superintendent; and that said Superintendent was removable at pleasure by the Board of Control.

During the pending of this question Mr. Kirkpatrick officiated as Superintendent, and upon the rendering of this decision immediately delivered to me all property, papers, &c., in his possession belonging to the State; and on the 1st of May I assumed active control of the affairs of the Prison. Hence it may be inferred that in view of the odium and prejudice which previously attached to the Institution, the circumstances at taking charge were peculiarly delicate and discouraging.

By an act of the Legislature, approved June 1, 1861, this was made a Receiving Prison; and in the judgment of your honorable Board created a necessity and gave authority for the appointment of a Warden *de facto*; in accordance therewith I was duly elected and qualified as Warden June, 1861.

COMMENCEMENT OF THE WORK.

During the months of April and May little more was done than to gather together the fragments of State property, as left by the vacated contract of Talbott & Costigan—prepare the Prison yard for work—level the grounds—and gather and repair implements for the active resumption of the work of construction as soon as an adequate appropriation should be made.

The task of organizing an establishment of this magnitude, selecting the proper men for the different departments of work, having constantly in view the greatest amount of labor and strictest economy in support and supply of material, adopting proper discipline to insure safety and the utmost efficiency, was neither light nor trifling.

Having, with your advice and earnest co-operation, reduced matters to a tolerable system, representations of our necessities were made to the Legislature, and the liberal appropriation of the extra session found us in a measure prepared to make a profitable use of the Prison labor, which we trust the sequel will show.

I was well aware that in most cases where matters of this kind have been undertaken by States, and appropriations have been made, a greater return was expected than the means justified, resulting to the prejudice of the party acting for the State or Government—consequently I determined that a full and itemized expose of the details of every transaction should be given in my yearly report.

In this connection one thing should be kept constantly in view—that the work was required to be accomplished with the labor of prisoners; and that not ten per cent. of the whole number of such laborers had any practical acquaintance with the labor they were required to perform. Hence the necessity of employing a large force of free mechanics, at the commencement of the season, to teach the

convicts the details of their trades; thus, at first, requiring a large outlay with a comparatively small return, while, as the season advanced, the expense was lessened and the return quadrupled.

The close of the season finds us with a large number of well-trained and efficient mechanics; so that on the opening of spring we shall be prepared to accomplish more with one-third the force, and at a much less cash expenditure comparatively.

It may be proper here to return my acknowledgments to Richard Epperson, Esq., the Master Mechanic and Superintendent of Construction, for his uniform courtesy, efficient co-operation and earnest effort to promote the interest of the State and the progress of the work under his charge.

By referring to the Table M it will be seen that the expenditures for the months of December, January, February and March amounted to the round sum of \$16,721 16, which amount was expended previous to commencing work the present season, and deducted from the total for the year \$60,987 11 leaves as total expenditures for all the time during which any part of the work was done \$44,265 95. The difference between the invoice of property made this day and that of the first of May is about \$9,963 40, which difference, added to the amount of work done, (see Superintendent's report, material and deducted for use,) \$41,000 00, shows a return of \$50,963 40, more or less, for the expenditures, of \$44,265 95, or a difference in favor of the prison of \$6,697 45 to profit and loss.

From the above it will be seen that since the abrogation of the Talbott & Costigan contract, the result of the State doing its own work with its convicts is a self-supporting institution, and a profit of nearly seven thousand dollars at the expiration of eight months and a half, commenced under great disadvantages and difficulties, which disadvantages will not have to be overcome on the resumption of work another season.

PRISON DISCIPLINE.

When we took charge of the institution it was under circumstances which precluded the immediate carrying into effect of a systematic plan of discipline. We have been and are obliged to conform, in a measure, to the circumstances of building, occupation, &c., and a system well adapted to penitentiaries having cells and appliances for preventing communication cannot be adopted with us except in a modified form. Yet, with our many disadvantages, we have found very little trouble in maintaining full control, good order and strict obedience.

It is by teaching the convict to respect himself, even in the Penitentiary, that we hope to keep him within the bounds of healthy restraint. By teaching him to respect himself we pave the way for reform, giving him to understand, by all our treatment, that his keepers are not his enemies, and the most hardened obey, with alacrity, most reasonable demands.

A firm, undeviating policy, appealing to men as rational beings, rather than treating them as brutes, gains the surest and most enduring ascendancy over them.

All State Prisons have for their first object the reform of the convicts. It cannot be desirable to turn a man loose from the Penitentiary a worse man than when he entered it. Yet the system of punishment adopted in this and many of our Penitentiaries is degrading, brutalizing and self-abasing in the extreme, both to him receiving and him administering. Therefore I would suggest a change in our discipline, in so far as the lash is concerned, substituting solitary confinement and its attendant privations. In the solitude of his cell the convict finds the amplest punishment, and, if capable of reflection, will examine himself and consider the cause and effects of crime without being bowed down with that feeling of personal degradation which is closely allied to desperation.

By reference to Table IX it will be seen that there are now confined in prison no less than 26 prisoners under the age of 21 years. Should not every dictate of humanity revolt at the practice of condemning the erring boy to associate with the confirmed villains? Daily communing with the concentrated and matured rascality of middle age, in a majority of cases, but prepares these youths for "high standing in the college of scoundrels."

For want of a place of solitary confinement we have used the lash in extreme cases, but are happy to state that the per centage of punishment is largely diminished. The system of term certificates for good behavior has a salutary effect and is most heartily approved.

The efforts of the Prison Chaplain have been crowned with flattering success, and the influence of reform is felt most sensibly in the conduct of the men.

Constant occupation is all-essential in the discipline of a prison.—Hence shop rooms should be abundant that all classes may be occupied at something. One great want, especially in the winter season, is found in accommodations for working our men. Three times the number of convicts in prison could be let at good rates had we the places in which to work them.

In this connection I cannot refrain from expressing myself under many obligations to Mr. Irvin N. Walker, Deputy Warden, for his efforts at promoting the discipline and good order of the prison, and promptness and zeal in discharging his duties. And to the gentlemen acting as assistant keepers, one and all, to their promptness efficiency and willingness to meet every emergency and hardship, is the institution largely indebted.

FINANCIAL STATEMENT.

By reference to the Clerk's Report a full and detailed statement of the financial operations of the past year may be found. Tables Marked A, a; B, b; C, c; D, d, are exhibits from December 1st, 1860, to April 1st, 1861. A, a, is complete for December in full,

which renders our exhibit for this year one-half month more than it should be. B, b, is complete for January and includes amount paid C. W. Seely from general fund January 15th, while the balance was paid from special appropriation of June 1st, on vouchers examined by the present Board of Control. C, c, includes expenses to 15th of March. D, d, from March 15th to the 31st.

The above were contracted for by my immediate predecessors, and given as they appear upon the books of the office.

To tables E, F, G, H, I, J, K and L, and the detailed statements, e, f, g, h, i, j, k and l, appended respectively, I would refer you for a complete expose of all the expenditures and receipts to Dec. 15th, during my administration of the affairs of the Prison. To table M I would refer for a tabular recapitulation and exhibit of the face of the Ledger; and to table N, for a balance sheet of receipts and expenditures.

Our annual invoice will be found in table O, and is a low estimate upon the amount of movable property connected with the Penitentiary.

The following may be considered a low estimate of the worth of the State's interest at this point:

Real estate at Prison	\$10,000	00	
Real estate, clay pit.....	1,000	00	
Main building foundations and wall.....	77,262	26	
Invoice of moveable property on hand, December 15, 1860.....	25,685	42	
			\$113,947 68

The printing and stationery account to the 1st of April will undoubtedly excite some attention, as it amounts to a sum entirely beyond what necessity required, or a due regard to economy should have allowed, and for which no adequate return is found in the material on hand at that date. In addition to the amount, \$818 75, I learn that a further amount of \$436 00 was allowed by the old Board and drawn from our appropriation, increasing the expense for stationery for the first four months of the year to \$1,254 75. What ever became of that amount of printing and stationery, I am at a loss to determine.

Our team account is necessarily heavy. A great part of the time the work on construction required about 30 head of oxen and horses.

The expense account includes several large items of permanent utility; the most important of which is the exchange of safes and payment of difference, \$400. It became necessary from this circumstance: The Investigating Committee summoned Mr. Angell, the then Clerk, to appear before them with his books. The safe key being deranged, it was deemed necessary to cut the same open, rendering it useless. By the exchange allowing us \$200, we have obtained one of capacity sufficient for the Prison for all time.

The fuel and light account has furnished another large item of

expense, and is mostly found in the extensive purchases for the burning of our kilns of brick.

Our armory account is made up from purchases of a superior lot of double-barrel shot-guns, the surest and most effective weapon for the use of our Assistant keepers.

The repairs of the Prison have mostly arisen from a defective roofing of corrugated iron; and I would urge upon the Board the necessity of the use of a different material for covering the roofs of the other Prison buildings.

The clothing account for the year shows the cost of clothing per man per annum, to average \$10 06. In this connection, in view of the advanced price of all woollen fabrics, and the difficulty of obtaining striped goods in quantities and at times as we desired; a change of uniform, making it two strongly contrasting colors, is recommended. And yet a more economical measure would be to purchase the latest pattern hand loom and fixtures, and manufacture our own cloth from the raw material.

The Guard account is necessarily large, owing to the variety of departments and widely separate points of labor in construction, and without walls, there has been a necessity for a much larger number of assistant keepers than will be needed in future; also, since work on construction has ceased, a large proportion of the men have been employed chopping wood for the Prison, and on contracts, requiring, of course, extra guarding.

Now that the walls are nearly completed, a sufficiency of buildings in which to profitably employ the men, is the great desideratum.

The provision account shows a total expenditure for provisions of \$8,262 40. Deduct therefrom the cost of five pairs of oxen, now in use, purchased in the spring and charged to provision account \$350; also hides and tallow sold, for which a return has not been made—\$500; leaving total expenditures for provisions, \$7,412 40; or making the cost of feeding our men, per man, per diem,—, a fraction more than ten cents.

For the economical management of the clothing and feeding departments, much credit is due the efficient Steward of the Prison, L. Kimball, jr.

The Hospital account shows an economical expenditure for that department of the Prison. The general health of the convicts has been excellent under the care of our skillful Prison Physician, Dr. Higinbotham. See report of Physician, for particulars.

The escaped convict account is much larger than I would desire, but for the coming year will amount to a merely nominal sum; for if an escape is attempted, the assistant keepers have become so thoroughly acquainted with the surrounding country, it must prove abortive.

The salary account includes amounts paid Superintendent, Clerk, Deputy Warden, Physician and Moral Instructor, of which \$1,847 28 was expended to April 1, 1861.

The Implement account includes the full outlay for shovels, picks, axes, carpenters' tools, &c., necessary to carry forward the work.

The Engine and Machinery account was all contracted previous to April 1st. the last item being a deferred freight bill.

The Discharged Convict account is large, and should not have come from our appropriation, since it enters neither into support or construction, but is an arbitrary provision of law, which must be met, no matter what the condition of the funds of the Institution.

The Account of amounts paid Architect should come under the expenditures for the first four months of the year, and the last payment was made for services rendered in January, and in consideration of plans, &c., furnished.

The account, under head of "New Prison," is mostly found in bills for clay train on Michigan Central Railroad and for lumber.

The traveling expense account includes absolute expenditures of money advanced by the officers when necessarily absent on business for the Prison.

The building account of the first four months is merged subsequently in the New Prison account.

The Farm account is small, and it may be proper to remark that the expenditures in labor, &c., have more than equalled the returns. We had about twelve hundred bushels of potatoes rot in the ground this winter; and the bean and the corn crop were nearly destroyed in the spring by late frosts.

Expense extraordinary account includes amount paid Attorney General Jones for opinion and several items of extra expense attending escaped convicts.

The lime, and cement, and iron, and nails accounts present the several amounts chargeable to the respective accounts. The smithing department has been under the direct superintendence of Mr. Earlywine, than whom no more skillful and energetic mechanic can be found.

The amount paid for transportation of prisoners is evidently not contemplated in the law for the removal of convicts, and should be reimbursed from some other fund.

The amount paid under head of "prisoners' overwork," was well expended, being reward to convicts for faithfulness and good work.

The expenditure for free labor, under head of "Mechanics' Labor," is alluded to in another part of the Report.

The resumption of labor another season will find us enabled to avoid this expense in a great measure.

PURCHASE OF REAL ESTATE.

Early in the season I found that our arrangements for obtaining clay were entirely inadequate and quite too expensive, and so represented to your honorable Board. In obedience to your instructions a negotiation was entered into with Hugh McCulloch, agent of Pitts-

burg, Ft. Wayne and Chicago Railroad, and the purchase consummated of 80 acres of land 16 miles west of Michigan City, on the line of the Michigan Central Railroad in Porter county, for purchase-money and costs, \$405.00. By means of this purchase an inexhaustible bed of Clay of the best quality, with a pit capable of holding a large number of cars, is secured to the State.

There is also upon the land about a thousand cords of wood. The land may be sold at any time for twice its cost. This purchase will have to be approved by the Legislature.

The expenditures for extra team hire became necessary in hauling wood for burning brick, as our own teams were inadequate to the supply, when brick making was in progress. This expense, as well as a large per centage on our team accounts, will be dispensed with in future, as our arrangements anticipate the delivery of our wood by railroad.

The Statistical Tables of the Prison are full and instructive, as will be seen by referring to the Clerk's report. Table VIII. gives the number in Prison Dec. 15th, 1861, at 147; committed since this was made a receiving prison 17. Received from the Southern Prison 200; making a total of 364 convicts. The number discharged by expiration of sentence has been 69; number pardoned 21; remanded 5; escaped 13; deceased 3. Total 111. Thus leaving at this date 253 prisoners. Of the pardoned 2 were blind and 1 insane. Of the escaped list 2 jumped from the cars while on the way from Jeffersonville to this Prison; 5 were of a class denominated in Prison parlance Trustees, men of short term and general good behavior, who were entrusted with the care of the teams and grounds outside the Prison walls. And here I may be allowed to say, and I believe the result justifies the conclusion, while something is saved in employing convicts, the constantly recurring escapes of such, and cost of hunting them renders this labor more costly than the employment of free-men.

CONCLUSION.

I cannot in justice close this report without expressing the obligations all connected with the Prison feel to Rev. John Sailor, Moral Instructor, and D. J. Baldwin, Esq., and other philanthropic persons for their persevering and well directed efforts to alleviate the moral condition of the convict.

I take great pleasure in tendering my warmest acknowledgments to Charles F. Kimball, clerk, for the able and satisfactory manner in which he has discharged the duties of his position; and for the aid assistance afforded me in the management and operation of all the departments under my supervision and control. Mr. Kimball is a very competent officer, a good, practical book-keeper, and a ready and accurate accountant; and your Board have been very fortunate in securing his services for that position.

To each member of your Honorable Body I am deeply indebted for your steady co-operation and efficient support in whatever pertained to the interest of the State; and I would not fail to mention Milton S. Robinson, Esq., who served with you till September when he resigned to answer his country's call.

I am, gentlemen,

Your obedient servant,

HIRAM IDDINGS.

Warden.

CLERK'S REPORT.

OFFICE NORTHERN INDIANA PRISON, }
MICHIGAN CITY, Dec. 15, 1861. }

To Hon. Board of Control and Warden:

GENTLEMEN:—I beg leave to submit the following detailed Financial Statement and Statistical Abstract from the books of the Prison for the year ending December 15, 1861.

Respectfully, your obedient servant,

CHAS. F. KIMBALL.

Warden's Account of Receipts and Expenditures from December 15, 1860, to January 1, 1861.

SUPERINTENDENT'S REPORT.

To the Hon. Board of Control:

GENTLEMEN:—The undersigned, Superintendent of Construction for the Northern Indiana State Prison, begs leave to submit the following report for the year ending December 15th, 1861:

On the 3d of June the undersigned commenced his duties. At that time there were 104 convicts at the Prison. On the 11th of July the number was increased to 198; and on the 1st of August the number was still further increased by convicts from the Southern Prison to 290. Owing to the necessary changes, in order to receive prisoners, the work was not fairly commenced until the 1st of July. Most of the men were inexperienced hands and unused to the kind of labor required of them. In starting the work on the brick yard considerable preparations had to be made. The old yard, having been injured by the frosts of the past winter and the increased number of men, compelled me to construct a new yard, which had to be graded and prepared, wells dug and appliances constructed for tempering the mud. As soon as these arrangements were completed and the yard prepared, the work commenced and was continued until the inclemency of the weather prevented the drying of brick.

As soon as the Board of Control could obtain the stone, and tools could be manufactured, as large a number of convicts were put to work on this branch as could be conveniently employed, and this work has been continued up to the present time. As soon as the weather became too cold for out-door work a temporary shop was made in which the convicts can work during the Winter.

On the 17th of June a carpenter's shop was prepared and a number of convicts were set to work at that branch. There was required a large quantity of trussels, scaffolds, rules, squares and other carpenter's work for the stone and brick work. The wheel-barrow, wagons and other necessary tools made by the carpenters, were, to a great extent, worn out in the use of them. The Warden and other officers of the Institution have done all in their power to advance the work, and have rendered me all the assistance possible in furthering the interests of the State.

EXHIBIT OF WORK ON PRISON.

EXCAVATION.

1,587 square yards excavating and filling up, at 16 cents per yard.....	\$253 92	
1,075 square yards excavating and grading at clay pit, at 16 cents per yard.....	169 12	
	<hr/>	\$423 04

STONE WORK.

2,328 feet of water table for main wall, at 60 cents per lineal foot	\$1,398 80	
5,376 feet of cut stone for main wall, at 60 cents per sup. foot.....	3,225 60	
1,044 yards of rubble-stone masonry, at \$5 per yard square.....	5,220 00	
56 dentals, at \$3 each.....	168 00	
75 buttress caps, containing 2,175 feet, at 60 cents per sup. foot	1,305 00	
2 gates, at \$600 each.....	1,320 00	
	<hr/>	\$12,635 40

NORTH-EAST TOWER.

650 feet of cut stone, at 60 cents per sup. foot.....	\$395 80	
60 feet of water table, at 60 cents per lineal foot.....	36 00	
27 yards of rubble stone masonry, at \$5.....	135 00	
	<hr/>	566 80

SOUTH-EAST TOWER.

1,123 feet of cut stone, at 60 cents per sup. foot.....	\$673 80	
60 feet of water table, at 60 cents per lineal foot.....	36 00	
33 yards of rubble stone masonry, at \$5 per yard square.....	195 00	
	<hr/>	904 80

SOUTH-WEST TOWER.

1,821 feet of cut stone, at 60 cents per sup. foot.....	\$1,092 60	
60 feet of water table, at 60 cents per lineal foot	36 00	
62 yards of rubble stone masonry, at \$5 per yard square.....	310 00	
	<hr/>	1,438 60

NORTH-WEST TOWER.

892 feet of cut stone, at 60 cents per sup. foot.....	\$536 20	
36 feet of water table, at 60 cents per lineal feet.....	21 60	
75 yards of rubble stone masonry, at \$5 per yard square.....	375 00	
2 corbels, at \$12.....	24 00	
7 quoins, at \$18.....	126 00	
	<hr/>	1,081 80

BRICK WORK.

2,003,976 brick in main wall, at \$6.50 per thousand.....	\$13,025 84	
Building furnace for oven in kitchen.....	167 36	
Building flues for blacksmith shop.....	15 00	
800,000 brick remaining in kiln, at \$5 per thousand.....	4,000 00	
	<hr/>	\$17,208 20

BLACKSMITHING.

236 iron bedsteads, at \$5.50.....	\$1,298 00	
3 hinges for railroad gates in wooden fences.....	26 00	
2 bolts for same, at \$2.50 each.....	5 00	
8 sets of hinges for railroad gates, at \$10.....	80 00	
Rods and irons for brick kiln.....	50 00	
12 tooth hammers, at \$3.....	36 00	
Ironing stone-boats.....	12 00	
Ironing ox yokes.....	12 00	
Hinges, stays and anchors for four towers.....	44 00	
Making and repairing tools for shops.....	100 00	
3 sledge hammers for yard, at \$2.....	6 00	
Wrenches for pumps and wagons.....	20 00	
Iron work for eleven pumps, at \$1.50.....	16 50	

40 stone wheel-barrows repaired, at \$1.....	40 00
25 pair of shackles, at \$2.50.....	62 50
Horse shoeing.....	50 00
Sharpening tools for stone cutting.....	400 00
Ironing twenty double-trees.....	25 00
Ironing levis for raising stone.....	5 00
10 new log-chains, at \$5.....	50 00
12 picks, at \$2.....	24 00
12 crow-bars, at \$3.....	36 00
1,000 points and chisels for stone cutting, at \$1.....	1,000 00
30 mortar hoes, at 70 cents.....	21 00
Ironing one large derrick.....	25 00
Ironing two small derricks.....	10 00
6 bush hammers, at \$6.....	36 00
50 hand hammers for masons, at \$1.50.....	75 00
36 stone hammers, at \$2.50.....	90 00
Ironing two car frames, at \$4.....	8 00
10 canthooks, at \$1.50.....	15 00
19 grates for towers and iron for cell house doors.....	450 00
1,200 pounds of railroad spikes and bench hooks for carpenters.....	66 00
Stone saws and rods and hinges and bolts for stone shed.....	30 00

PHYSICIAN'S REPORT.

HOSPITAL DEPARTMENT, }
Northern Indiana State Prison. }

To Messrs. Hanna, Williams and Votaw, Board of Control:

GENTLEMEN:—On the 28th of March, 1861, your honorable body appointed me Physician of the Northern Indiana State Prison, and I immediately entered upon the discharge of the duties of this responsible office. I found in the hospital fifteen patients, and among those were seven cases of chronic granular conjunctiva, attended with great constitutional and nervous debility, but all yielded to treatment eventually, with good sight to the patients. Since that time we have had no cases of this kind so severe, all speedily recovering. In addition to the above cases, there have been chronic diseases which were either constitutional, or contracted during a life of dissipation and debauchery. Many of these patients have been entirely relieved and completely cured. But the great majority of cases which occurred, have been of an acute character, and have readily yielded to proper treatment. Intermittent fever has been the most prevalent disease here, especially during the months of August and September. Only three deaths have occurred since the month of March last. One died of inflammation of the stomach, after an illness of one week; the second died of intermittent fever, with an organic disease of the heart, as revealed by post mortem examination; and the third was shot while trying to make his escape from the prison.

The following cases have required surgical operations: Two cases of epithelial cancer, and one of hydrocele, have been successfully treated. Minor cases, requiring surgical operations, were of almost daily occurrence.

The number of patients admitted to the hospital from the 28th of March to the 15th of December of the same year, with the respective diseases with which they were afflicted, may be seen by a reference to the exhibit below. In addition to these, there have been a num-

ber of patients who received slight injuries from time to time, while engaged at labor, and in consequence were excused from work; and as their situation demanded no particular treatment, they were not sent to the hospital. The number of patients admitted to the hospital, to which are added the number excused from labor, form an average of fifteen a day. The work of constructing the prison being all heavy labor, the patients, on recovering from sickness, have been kept longer away from work than they otherwise would have been, in consequence of the exposed condition in which their work was situated, as out door laborers. Cases of feigned sickness are of daily occurrence, and require more careful examination than the actually diseased. In the disposition of these cases, I have endeavored not to err at all, but where there has been a doubt in my mind, I have invariably felt it my duty to construe that doubt in favor of the prisoner.

S. HIGINBOTHAM, M. D.

REPORT OF THE MORAL INSTRUCTOR.

To the Board of Control of Northern Indiana State Prison:

GENTLEMEN:—The State of Indiana, in its wisdom, has instituted the office of “Moral Instructor,” and thus shown its appreciation of the value of religion, in the moral reformation of the convict. For that legislation which merely contemplates the discipline of the prisoners, however perfect, ignores man’s highest faculties, his intellectual and moral nature. If man were merely an intelligent animal, this might be sufficient; but he has hopes and fears, thoughts and feelings, that lie far beyond the plane of mere discipline.

Ever since Howard called the attention of the world to the condition of the criminal, and demonstrated that, though erring, he was still a man and a brother, a great improvement has been manifested in their management—among which may be mentioned the provision for their health; the distribution of books for the cultivation and elevation of their minds; the observance of the Sabbath; the privileges of the sanctuary and of the Sabbath school; and the various influences by which the gospel can be brought to bear upon the heart and conscience.

We know that many are disposed to look upon the moral and spiritual elevation of the criminal as beyond the range of probability, or even possibility. But cannot Almighty grace reach the heart, even though steeped in iniquity and polluted by sin. It saved a Mary Magdalene, a John Newton, and a Bunyan; and shall we say that it has lost its power to renew and sanctify even the most abandoned.

There are many reasons why the gospel should take hold of the heart of the convict, even amid the adverse circumstances with which he is surrounded, and the apparent hopeless condition in which crime has placed him. The external enticements to evil are gone; the rum bottle is out of sight; the card-table is beyond his reach; the “house of her whose steps take hold on hell” no longer entices. He has time for reflection. His mind runs back to the time when he sat upon his mother’s knee an innocent boy, and he recollects the soft hand that was so often laid upon his head, and endeavored to guide him into the paths of virtue and religion. He remembers his first

crime, and how he was led along, step by step, until he found himself incarcerated within the gloomy walls of the prison. He is there alone. He has no one to sympathize with him; he cares for no one, and no one cares for him. And in this sad and dispirited state, the gospel finds him; and when its claims are proffered in kindness, is it singular that he should sometimes open his heart to receive it? And again, many have not heard the gospel perhaps for years, and their sensibilities are not hardened against its influence, and when brought under its power they readily yield to its embrace.

Believing, therefore, that no one is beyond the reach of the gospel, and seeing a disposition in some of the prisoners to receive it, additional religious meetings were instituted about the first of September, and have been kept up twice during the week ever since; and the conversion of a large number has been the result. How many can only be known in the investigations of the last day, as many are constantly leaving; but at one time nearly 40 informed me of their determination to reform their conduct and live Christian lives. On last Sabbath some 17 were organized into a church, and many besides are indulging hope that they are Christians—changed men.

Preaching has been regularly maintained every Sabbath, assisted by Rev. Messrs. Foxworthy and Buckles. A Sabbath School of great interest has maintained regularly, superintended by D. J. Baldwin, Esq., whose labors in this and various exercises during the week have been of great service, and are warmly appreciated by the prisoners.

A large and well selected library consisting of 413 volumes, has been purchased by Miles J. Fletcher, Esq., Superintendent of Public Instruction, and its benefits are now enjoyed by the prisoners, and will be a rich source of pleasure and improvement to them. And I have also been enabled nearly every week to distribute a large number of newspapers, mostly of a religious character, and tracts, which have been eagerly sought and read, and have doubtless contributed to their moral improvement. And there is no question but that a small sum judiciously invested for religious papers and tracts would be a great help to me in my work, and also materially aid in the discipline of the prison. And I speak the more freely on this point because your own judgments have led you to do something in this direction—perhaps all that the limited appropriation would allow.

And in conclusion I would say that I received the most cordial co-operation from the Warden, and have been very materially aided by other officers of the Institution in the discharge of my duty. All of which is respectfully submitted.

JOHN SAILOR, *Moral Instructor.*

Dec. 15, 1861.

FIFTEENTH ANNUAL REPORT

OF THE

OFFICERS

OF

The Southern Indiana State Prison,

INCLUDING THE REPORTS OF THE

BOARD OF DIRECTORS, WARDEN, PHYSICIAN,
AND MORAL INSTRUCTOR,

FOR THE YEAR 1861.

TO THE GOVERNOR.

INDIANAPOLIS:

BERRY R. SULGROVE, STATE PRINTER.

Doc. J. 36.

1862.

DIRECTORS' REPORT.

INDIANA STATE PRISON, }
JEFFERSONVILLE, Dec. 2, 1861. }

To His Excellency, Oliver P. Morton,
Governor of the State of Indiana:

We have the honor to submit to your Excellency the following as our annual report of the operations and condition of the State Prison at this place for the current year, ending December 15, 1861:

At the first meeting of this Board, in April last, David W. Miller, the present incumbent, was unanimously re-elected Warden. The subordinate officers of the Prison were also filled at the same meeting.

We are happy to be able to report to your Excellency that notwithstanding the financial pressure which has embarrassed industrial operations of all kinds, this Prison is now clear of debt. Our earnings have also reached a larger figure than we had dared to anticipate at the commencement of the year. The removal of 200 convicts to the Northern Prison has very much diminished our expenses, and also, in the same ratio, our opportunities for securing the proceeds of convict labor. Their removal was undoubtedly necessary at the time the act authorizing the same was passed by the Legislature. During the last fall we could, however, have contracted for the labor of more convicts than are here at present. Our last report shows that the total receipts from convict labor for the year ending December 15th, 1860, amounted to \$48,657 40. The Warden's reports and subjoined tables show that the receipts from the same source for the year ending December 15, 1861, amount to \$22,905 27. Deducting therefrom \$6,955 22, the amount charged for convict labor employed in making improvements and in the necessary service of the Prison,

there will remain a balance of \$15,950 22, which shows the actual receipts from contractors. When we remember that for the first six months of the present year our men were nearly all idle, and that the contractors paid us comparatively nothing for their labor, and, also, that for the last six months we have had only one-half as many men to work as we had last year, we think we may congratulate ourselves upon the successful management of the Prison at a time when mechanical enterprise of all kinds was almost universally prostrated. Our convicts have been employed during the last summer and fall in the manufacture of army boots and shoes, transportation wagons, tent poles, cots and other articles for military uses. We have been able to contract nearly all our available men, but at lower rates than those formerly paid. It will be idle to expect, for some years to come, the same rates for convict labor which were formerly paid here. Our contractors sold their manufactured articles almost entirely in the Southern States. Their customers in the States under insurrectionary control could not pay the contractors, and therefore they could not pay the Prison. As long as the present rebellion continues that market will be closed, and the contractors must sell their wares, if at all, at low rates, in the Northern States, and where they must compete not only with other Prisons, but with free labor outside of prison walls. We have now on hand over \$10,000 in value of articles manufactured here which we have taken in satisfaction of dues for convict labor. We expect to make these available upon the advent of better times. In spite of the untoward circumstances and discouragements by which we have been surrounded, we are now, as we have hitherto been, fully satisfied that the congregate system of convict labor contracted at moderate rates will be more beneficial than any other system both to the convict and the State. The experience of this and of every other prison in the country shows that under the most favorable circumstances a prison can only be expected to support itself. But very few, if any, do even this, and a careful examination of the Prison reports of the different States will show that this institution comes nearer that mark than a large majority of the others.

The present sanitary and moral condition of this prison will compare favorably with that of any similar institution in the country.— During the past year we have had but little sickness and few deaths. The convicts, when sick, receive competent medical attention and are carefully nursed. Under the superintendence of the Moral Instructor the convicts attend a night school where they are instructed in the elementary branches of an English education. During the last winter and spring we also had a day school which was attended by the unemployed convicts. Upon Sunday they hear preaching in the Chapel, and are also instructed in the Sabbath School. For a more particular statement of these matters we refer your Excellency to the accompanying reports of the Physician, Moral Instructor and Keeper of the Female Department. The part of the prison assigned to the female convicts has been enlarged and greatly im-

proved. With proper care and effort on the part of those in charge of it the female department can now be made effective and creditable to the institution. The Warden's report and the tables of expenditures furnished by the Clerk will show what has been done with the money appropriated by the Legislature. The outstanding debts of the Prison have been paid, and we believe the money has been faithfully and judiciously expended. We were authorized by the act approved March 11, 1861, to purchase a tract of land for a burial place, which was not to exceed four acres, and at a price not exceeding \$150 per acre. We have purchased an acre of land near the prison for \$150 and have had it properly enclosed. It is believed that this lot will answer all purposes for a burial place for twenty years to come.

The experience of the last year shows that the Legislature of 1861 were wise in acting upon the suggestions of the Prison reports of 1859 and 1860. The system of certificates of good behavior and subsequent commutation of punishment has proved very beneficial in its operation. It has tended to promote good order and discipline and is more equitable to the contractor than the old system of overwork.

The State of Indiana has been liberal to and proud of her benevolent institutions. We shall strive to be faithful in the discharge of the trust imposed upon us, and hope to carry out successfully, under more favorable auspices, the views of those by whose legislative action the present system of prison discipline was inaugurated in this State.

Respectfully submitted, &c., &c.,

GRAFTON F. COOKERLY,	}	<i>Directors.</i>
THOS. M. BROWN,		
A. L. CROTHERS,		

WARDENS' REPORT.

TO MESSRS. COOKERLY, BROWN, AND CROTHERS,

Directors of the Indiana State Prison, at Jeffersonville:

The fiscal year of the Prison having ended on the 15th inst., I herewith transmit to you, in compliance with the law, my annual report of the workings of the institution the past year. The improvement of the Female Department which was authorized by an act of the last regular session of the Legislature, I am happy to state, has been thoroughly completed. The Female Department has thereby been rendered much more convenient and comfortable and much better adapted to good discipline and a reformation of the unfortunate convicts. A large dining room, kitchen, work room, hospital, and ten additional cells, have been added to this department, all of which were necessary.

The addition to the Warden's house, authorized by the Board, has also been completed and affords much convenience. For the cost of this and the improvement of the Female Department, I refer you to statement marked (S.) By your authority I purchased from the estate of James Kerguin one acre of ground for one hundred and fifty dollars, which I have fenced in with a good and substantial board fence. It is convenient to the Prison and well situated for a graveyard, for which purpose it is intended.

The gas account, to which reference was made in my last annual report, has been settled with Messrs. Miller & Bro.

Since I made my last report the following contractors have abandoned their contracts, viz., Adam Knapp, John R. Cannon & Co., and Charles Hendley. W. G. Damron's contract expired on the first day of June, 1861, which he failed to renew.

Contracts have been made with Charles and Isaac Long for fifteen hands to be worked at chair making, at 40 cents per day, for the term

of six months, to commence on the 1st of day of January, 1862. Also with Adam Luckhaupt a contract for five years from the first day of January, 1862, for the first six months twenty-five convicts, with the privilege of increasing the number to fifty at the expiration of that time at 40 cents per day.

During the first six months of the past year there was, on an average, about three hundred and eighty-five convicts, at least half of which were unemployed and a dead expense to the State. This will account for the great disparity between the receipts and expenditures during that time.

By the act of June 1, 1861, the Governor was authorized to remove two hundred convicts from this to the Northern Prison, and upon the order of His Excellency presented by the officers of said Prison, I delivered over into their custody at this Prison, June 10th, fifty, June 28th, fifty, July 8th, fifty, and July 23d, the remainder of the two hundred.

In anticipation of their removal I purchased a large lot of stripes and other material and caused to be made a new suit of clothing for each one of them, and furnished the first fifty sent each with a new pair of shoes. By my instructions the clerk made out a bill for the clothing and shoes which was presented to the Board of the Northern Prison, which they refused to pay without giving the least excuse therefor. In order to obtain the amount of said bill, which is nine hundred and sixty-nine dollars, I visited the Prison, and am sorry to say that I found no one there that appeared to be at the head of affairs, and discipline and everything connected with the concern seemed to be at loose ends. The convicts were running at large both in the country and the city, seemingly without the least restraint.

Our convicts are now all profitably employed, being engaged in making barrels, chairs, tent-poles, shoes, &c., the same being hired to different persons at forty cents per day.

The wisdom of the law passed by the late Legislature making good behavior the basis of a commutation of time of sentence, has had a very salutary effect upon the conduct of the convicts. Since its adoption punishment has been much less frequent than before, and the general discipline of the prison has greatly improved.

For monthly statements in regard to moneys received and disbursed, I refer you to the statistics furnished by the Clerk, marked A, B, C, D, E, F, G, H, I, J, K, and L.

For amount paid discharged convicts I refer you to statement marked O, and for a full statement of assets and liabilities, I refer you to statement marked Q.

For the number of convicts, ages, sex, &c., I refer you to the interesting statistics furnished by the Clerk and marked from No. 1 to No. 20, inclusive.

For the health of the Prisoners I refer you to the report of the Physician, and for their moral condition, to the report of our most

worthy and excellent Moral Instructor. For matters touching the Female Department, I refer you to the report of the Matron.

By refering to the Clerk's report, and a careful examination of the same, it will be seen that notwithstanding the stringency of the times the Prison has maintained itself.

The appropriation of ten thousand dollars made by the Legislature to liquidate the indebtedness of the Prison, existing at the end of the fiscal year for 1860, was entirely used for that purpose, and I feel proud in saying that the Institution is now free of debt.

In conclusion, permit me to tender to you my thanks for your co-operation in all things tending to advance the interest of the Prison and rendering it efficient for the purposes intended.

Respectfully submitted,

D. W. MILLER, *Warden.*

PHYSICIAN'S REPORT.

HOSPITAL DEPARTMENT, }
Indiana State Prison, December 15, 1861. }

To the Board of Directors:

GENTLEMEN—In making this, my annual report upon the condition of this department of the Institution, in accordance with its regulations, I am happy to say that during the year we have had an unprecedented immunity from disease of any serious character.

The number of prescriptions made is 6,296. The whole number of patients treated, both in the Hospital and outside, is 1238. Three deaths have occurred—one from typhoid fever, one from pulmonary consumption, and the other from hemorrhage of the bowels.

At this time the convicts are almost totally free from disease. True, that among so many men, mostly of previous bad habits, there would necessarily be chronic cases, requiring occasional attention. Besides such, slight indispositions daily make their appearance. The beds, however, have not had an occupant for some time. It gives me pleasure in stating that the Warden has co-operated with me in everything I thought it advisable to suggest, relating to the hygiene or medical management of the Institution.

Respectfully submitted,

W. F. COLLUM.

MATRONS' REPORT:

INDIANA STATE PRISON, }
Female Department, Dec. 15, 1861. }

To the Board of Directors:

In compliance with the rules of the Prison, I proceed to place before you my annual report. I have little to state but the completion of the building, which makes this department what it should be—a Prison with all the necessary accommodations for the comfort and health of the prisoners, and affording every facility for enforcing the prison rules, which was heretofore impossible.

The last year has been one of general good health, prosperity, and industry. We have employed the females very successfully, in seating chairs, and manufacturing hats for the use of the male prisoners.

I have still continued my instructions when time permitted, in the elementary branches. Some have improved very rapidly, others more slow, according to their capacity. For statistical information I refer you to the Clerk's report. I close this brief report by *asking nothing* but a continuance of your past careful oversight, with many thanks to you and the Warden for the improved condition in this department.

Respectfully submitted,

MARY A. JOHNSON, *Female Keeper.*

MORAL INSTRUCTOR'S REPORT.

SOUTHERN INDIANA STATE PRISON, }
Moral Instructor's Office. Dec. 18, 1861. }

TO MESSRS. COOKERLY, BROWN, AND CROTHERS,

Gentlemen:—In presenting my annual report, I regret not being able to furnish a more interesting account of my department than is here laid before you.

The year past has been one of great affliction with me. Death has invaded my family circle. I have been bereft of my best earthly friend, my children having lost their mother. This is a trial having no parallel in the social walks of life.

I love my children—they are dearer to me than life itself. I also love my country, and when the worst of foes, those of our own household, rose up in armed rebellion against our common country, I could not go in her defence, but I had sons that could, and four have gone, mingling with the marshalled hosts of the loyal and the true in vindicating the honor of our nation's flag. I may never see them again. These things have deeply affected me, and I have been at times almost disqualified for the discharge of the appropriate functions of my office. Yet under all these circumstances I have not lost sight of my responsibilities, and have endeavored to be faithful to my work. I thank you for your kind forbearance and the assurance that I share in your sympathies in the midst of my afflictions.

The various means authorized by the State to be employed for the mental and moral improvement of the unfortunate convict continue to be used, and with evident success in many cases.

We labor with more encouragement and hope than heretofore because of the reduction of our number, some 200 having been transferred to the North Prison during the past summer; now we are not crowded, affording an opportunity of a more general personal inter-

course with the men, which is very important in the accomplishment of good.

A great change for the better has taken place in the conduct of the prisoners by the working of that very wholesome law passed by the Legislature of last winter, authorizing a reduction of the term of sentence on the consideration of good behaviour. All are benefitted thereby, but more especially those who have been very irregular in their habits, as under the promptings of such a motive a spirit of subordination will be engendered which may lead to habitual well-doing hereafter, thus laying the foundation of a decided reformation in life and character, as idleness and reformation are wholly incompatible.

The Library is regarded with great interest by the reading portion of the prisoners, as affording profitable entertainment during the dreary hours of their confinement. But many of the books are not at all suited to the taste or adapted to the condition of those intended to be benefitted by the library; beside quite a number of the books have become so mutilated and worn as to be unfit for use, so that there is a felt deficiency in the supply of suitable books. Yet we are gratified to know that this deficiency will soon be remedied and our library well replenished, when the benefits of a law passed last winter shall be realized, which provides for raising a tax to be applied to the purchase of libraries for all the Common Schools and State Prisons, thus securing to us annually from sixty to eighty dollars for this special purpose.

Our night school is in a prosperous condition, and all who desire are permitted to attend. Many get the rudiments of an education here who otherwise would remain ignorant the balance of their days.

The Sunday School and Chapel services are highly appreciated, and I have reason to believe that some good is being accomplished through these instrumentalities.

I wish here to acknowledge a valuable donation of a number of German Bibles and Testaments from the American Bible Society through their worthy agent, Rev. W. Terrell.

I trust, through your forbearance, the hearty co-operation of the kind officers, with whom I am associated, and the blessing of God, I shall in future be more successful in my work and labor of love.

Respectfully submitted,

JOHN W. SULLIVAN,
Moral Instructor.

10
MESSAGE OF
GOVERNOR MORTON

TO THE

LEGISLATURE,

AT ITS EXTRA SESSION,

APRIL 24, 1861.

INDIANAPOLIS:

BERRY R. SULGROVE, STATE PRINTER.

1862.

GOVERNOR'S MESSAGE.

Gentlemen of the Senate and House of Representatives:

You have been summoned together under circumstances of the most grave and important character. Our country is placed in a condition hitherto unknown in her history, and one which all patriots and lovers of liberty throughout the world had fondly hoped would never occur. Civil war, that has ever been the bane of Republics, has been inaugurated by certain rebellious States, which, unmindful of their constitutional obligations, and regarding not our common history, blood, interests and institutions, are seeking to dismember the Nation and overthrow the Federal Government, so wisely, and as we had believed, permanently established by our fathers.

The origin of this most wicked rebellion dates back more than thirty years. It is well known that distinguished Southern Statesmen, as early as 1829, cherished the dream of a vast Southern Slaveholding Confederacy, comprehending the conquest of Cuba, Mexico and Central America. The determination was then formed to break our Republic into pieces by any available pretext. The first one seized upon by South Carolina, was the tariff question; and had not the Nation had for its Executive a man greatly distinguished for patriotism, courage and decision of character, wide, spreading and disastrous consequences, might have followed. By prompt and energetic action, the rebellion was crushed out for the time, to be revived as subsequent events have shown, on new pretenses and in another form.

The election of a President of the United States through the forms of the Constitution, entertaining opinions obnoxious to certain States of the Confederacy, is boldly published to the world as just cause for the dissolution of the Union, and bringing on if necessary for that purpose all the horrors of a bloody revolution. It would be an insult to your intelligence to argue that the admission of this pre-

tense as justification would be clearly fatal to all republican government; that popular institutions can only be sustained by submission to the will of the people as expressed through the forms of the Constitution, trusting to the peaceful remedy of the ballot-box for the redress of grievances. And the wickedness of this pretense is greatly aggravated by the reflection, that it is utterly hypocritical, that it was only put forward in furtherance of schemes entertained for years, and supported by notoriously false assumptions of fact and logic.

When we read the history of the late Democratic Convention at Charleston by the light of subsequent events, can we fail to see that the scheme of secession and dismemberment of the Republic was then completely formed, and that the disruption of that Convention was one of the steps towards its consummation. If confirmation of this opinion were needed, it will be found in the fact that certain traitorous members of Mr. Buchanan's Cabinet were systematically engaged, for many months before the late Presidential election, in placing the arms and defenses of the nation in a position to be readily seized by the seceding States.

Secession was at first argued as a right springing from the Constitution itself, but as the movement gained strength, the flimsy pretext was abandoned, and ceased to be a subject of discussion, and what in an hour of weakness was claimed by feeble argument, is now boldly asserted by military power.

The North, conscious of her strength and the rectitude of her intentions, has hitherto remained quiet, making no preparation whatever for a conflict of arms. Her forbearance has been construed into cowardice, and her efforts to keep the peace have but provoked increased insolence and aggression. The secession movement has from the beginning been an act of war. Ordinances of secession have been immediately followed and sometimes preceded by the violent seizure and plunder of national property, and the forcible expulsion of the agents and officers of the Federal Government. From the very first, and at every step in its progress, it has been distinguished by acts of hostility and outrage, alike injurious to the nation and insulting to the people of the loyal States.

The secessionists were profoundly convinced that the co-operation of the Border Slave States could not be procured without a conflict of arms between them and the Federal Government, and hence have labored assiduously to place the government in a position that a collision could not be avoided, except by the most abject submission and humiliation. The intention to force a conflict has been most apparent, and delay was suffered only that they might complete their preparations; and when at last their preparations were complete, and wearied by the long forbearance of the Government they inaugurated hostilities by assaulting and reducing Fort Sumter.

The place where Fort Sumter is situated had been regularly ceded by the State of South Carolina to the Federal Government, and by an express provision of the Constitution was under the exclusive

jurisdiction of the United States. It was unfinished and held by a garrison of less than one hundred men, and while in this condition was invested by a large army, cutting off all approach to it by sea or land. The stock of provisions was almost exhausted and the immediate prospect was presented to the feeble garrison of starvation, or yielding up into the hands of an avowed enemy a fortress of the United States. At this juncture, the Federal Government, which had waited long, perhaps too long, declared its determination to send provisions to the garrison. Before this attempt could be made, and before a single sail of the fleet was seen off the harbor, a powerful cannonade was opened upon Sumter, which resulted in its destruction and surrender.

Every day brings us intelligence of new outrage and assault.—Throughout the rebellious States is heard the note of preparation for an extensive and aggressive campaign. The National Capital is menaced, and every avenue of approach for Federal troops and provisions is attempted to be cut off. The free navigation of the Mississippi River, the great artery of Commerce of the Northwest, is obstructed; and the usurping government of the rebellious States has issued a Proclamation inviting the freebooters of all the world to prey upon our National commerce.

We have passed from the field of argument to the solemn fact of war, which exists by the act of the seceding States. The issue is forced upon us, and must be accepted. Every man must take his position upon the one side or upon the other. In time of war there is no ground upon which a third party can stand. It is the imperative duty of all men to rally to the support of the Government, and to expend in its behalf, if need be, their fortunes and their blood. Upon the preservation of this Government depends our prosperity and greatness as a nation; our liberty and happiness as individuals. We should approach the contest not as politicians, nor as ambitious partizans, but as patriots, who cast aside every selfish consideration when hushed, and the bitterness that may have sprung out of political contests be at once forgiven and forgotten. Let us rise above these paltry considerations, and inaugurate the era, when there shall be but one party, and that for our country. The struggle is one into which we enter with the deepest reluctance. We are bound to the people of the seceding States by the dearest ties of blood and institutions. They are our brothers and our fellow countrymen. But if they regard not these tender relations, how can we? If they wage war upon us and put themselves in the attitude of public enemies, they must assume all the responsibilities incident to that position.—But while I deplore deeply the character of the contest in which we are engaged, nevertheless we should meet it as men.

To our sister State of Kentucky we turn with hope and affection. She has grown rich and prosperous in the Republic; could she do more if she were out of it? It would be a sad day that would sever the bond which binds these States together, and place us in separate and hostile nations. I appeal to her by the ties of our common kin-

dred and history; by our community of interest; by the sacred obligations that bind us to maintain the Constitution inviolate, to adhere to the Union, and stand fast by that flag in defence of which she has so often shed her best blood. I pray her to examine her past history and perceive how the tide of her prosperity has flowed on unbroken, and ever increasing, until her limits are filled with material wealth and her people are respected, elevated and happy; and then inquire if all this is not the result of that Union she is called upon to break, and of that government she is invited to dishonor and overthrow. To ask Kentucky to secede is to ask her to commit foul dishonor and suicide. I trust that the good sense and patriotism of her people will not suffer her to be dragged by the current of events, which has been cunningly invented for that purpose, into the vortex of disunion; nor permit her to be artfully inveigled into an armed neutrality between the rebellious States and the Federal Government. Such a position would be anomalous and fatal to the peace and perpetuity of the Union. There is no ground in the Constitution midway between a rebellious State and the Federal Government upon which she can stand, holding both in check and restraining the Government from the enforcement of the laws and the exercise of its constituted authority. Such an attitude is at once unconstitutional and hostile. At a time like this, if she is not for the Government, aiding and maintaining it by the observance of all her constitutional obligations, she is against it. If the voice of her people can be heard, I fear not the result. Secession can only triumph, as it has triumphed in other States, by stifling the voice of the people and by the bold usurpation, by demagogues and traitors, of the powers which rightfully belong to them alone. And I might here remark, it is quite manifest that the schemes of the authors and managers of the rebellion, extend far beyond the dissolution of the Union, and embrace the destruction of the democratic principle of government, and the substitution of an aristocracy in its stead. In the seceding States the control of public affairs has been withdrawn substantially from the people, and every proposition to submit to their consideration measures of the most vital importance has been contemptuously overruled; and we are in truth called upon to fight not only for the Union, but for the principle upon which our State and National Governments are founded.

If the rebellious States hope to profit by dissensions in the North, they have erred egregiously, and have wholly failed to comprehend our people. Our divisions were merely political, and not fundamental; and party lines faded instantly from sight when the intelligence went abroad that war was being waged against the nation. When the sound of the first gun reverberated through the land, the people of the North arose as one man, and declared that the Government must be sustained and the honor of our flag preserved inviolate at whatever cost. The events of the last ten days are pregnant with instruction and moral grandeur. They present the action of a people who have suffered much and waited long; who were slow to take offense and incredulous of treason and danger; but who,

when the dread appeal to arms was made and the issue could no longer be avoided with honor or safety, promptly abandoned the peaceful pursuits of life and devoted themselves to the service of their country. I trust that the force of this lesson may not be lost upon our erring brethren of the South, and that they will at once perceive they have inaugurated a contest from which they cannot emerge with honor or profit.

On the 15th day of the present month the President of the United States issued his Proclamation calling upon the loyal States to furnish 75,000 men for the protection of the Government, the suppression of rebellion and the enforcement of the laws. Subsequently the quota to be furnished by Indiana was fixed at six regiments, of seven hundred and seventy men each. In obedience to this call I issued my Proclamation calling for volunteers, and in less than eight days more than 12,000 men have tendered their services, and the contest among the companies has been earnest and exciting as to which shall secure a place within the quota. This response has been most gratifying and extraordinary, and furnishes indubitable evidence of the patriotism of Indiana, and her entire devotion to the Union. Without distinction of party, condition, or occupation, men have rallied around the national standard, and in every part of the State may be heard the martial sound of music and witnessed the mustering of companies into the field. In view of this remarkable response made to the Proclamation on the 20th inst., I tendered to the President for the service of the United States six additional regiments; but telegraphic and postal communication having been cut off with Washington, no answer has been received up to this time. A camp was formed in the neighborhood of this city for the reception of the troops, and Major Wood, of the U. S. Army, has been busily engaged for several days in mustering them into the service. There are in camp —— companies, being an excess of the number called for by the President, and in addition to that, every company largely exceeds, and in some instances more than doubles the number that can be finally received into the company. Some companies came by mistakes unavoidably occurring in the office of the Adjutant General, and others without marching orders. They will be retained in camp and provided with quarters and subsistence, awaiting the action of the Legislature. I cannot refrain from here expressing the opinion that has been uttered by many who have visited the camp, that finer material for a gallant army was never assembled.

The report of the Adjutant General, Lewis Wallace, is herewith transmitted, and I beg leave in this manner to tender him my hearty thanks for his able and efficient services in that department.

In view of all the facts, it becomes the imperative duty of Indiana to make suitable preparations for the contest by providing ample supplies of men and money to ensure the protection of the State and General Government in the prosecution of the war to a speedy and successful termination. I therefore recommend that one million of dollars be appropriated for the purchase of arms and munitions of

war, and for the organization of such portion of the Militia as may be deemed necessary for the emergency. That a militia system be devised and enacted looking chiefly to volunteers, which shall insure the greatest protection to the State, and unity and efficiency of the force to be employed. That a law be enacted defining and punishing treason against the State. That a law be enacted suspending the collection of debts against those who may be actually employed in the military service of the State or the United States. That suitable provision be made by the issue of the bonds of the State or otherwise for raising the money herein recommended to be appropriated. And that all necessary and proper legislation be had to protect the business, property, and citizens of the State, under the circumstances in which they are placed.

O. P. MORTON, *Governor.*
